

Supplementary Information

Supplementary Figures and Legends

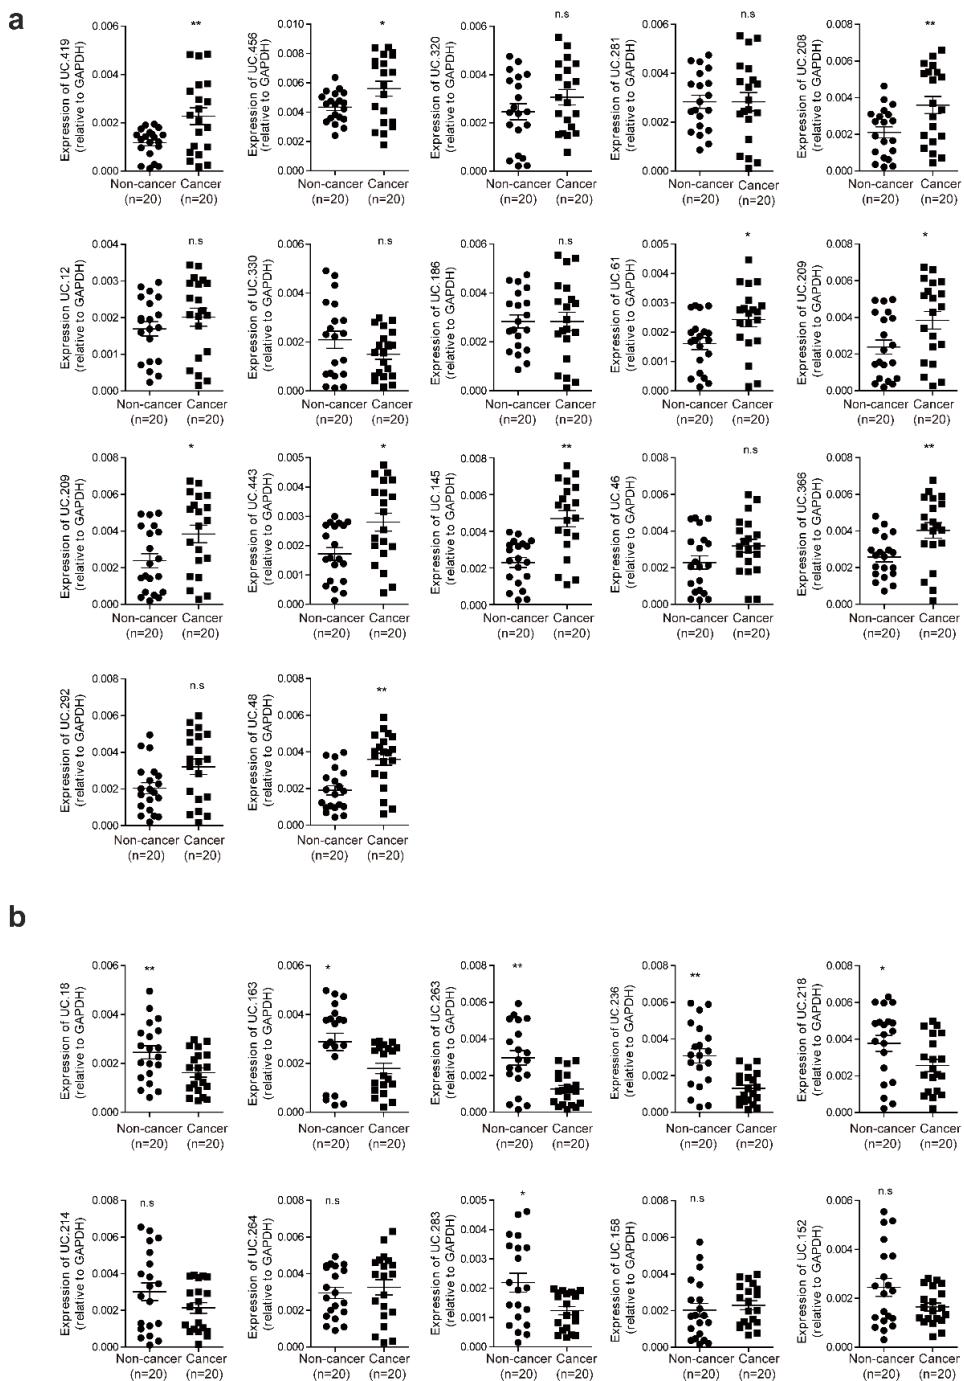

Figure S1. T-UCR validation. **(a)** Using microarray analysis results, 17 T-UCRs with increased mRNA expression were identified in 20 samples obtained from patients with gastric cancer (GC), measured using qRT-PCR. **(b)** Relative mRNA expression of ten T-UCRs with reduced expression in GC tissue measured using qRT-PCR. FC > 2.0, $p < 0.05$. Data are shown as mean \pm SD of three independent experiments (* $p \leq 0.05$; ** $p \leq 0.01$).

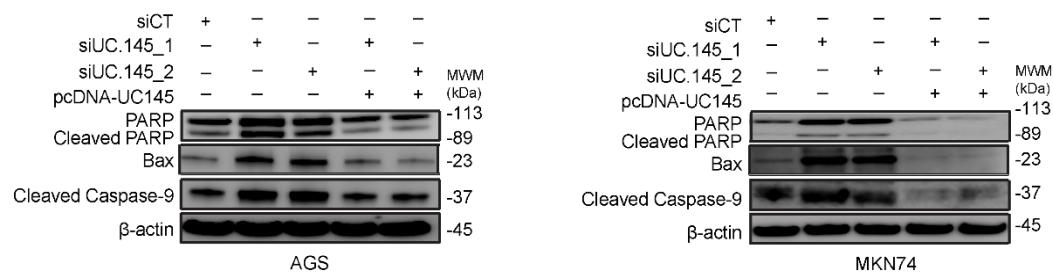

Figure S2. Effect of UC.145 on apoptosis. Western blot analysis of apoptosis marker protein levels in AGS (**left panel**) and MKN74 (**right panel**) cells transfected with siControl (siCT), siUC.145s, or pcDNA-UC.145.

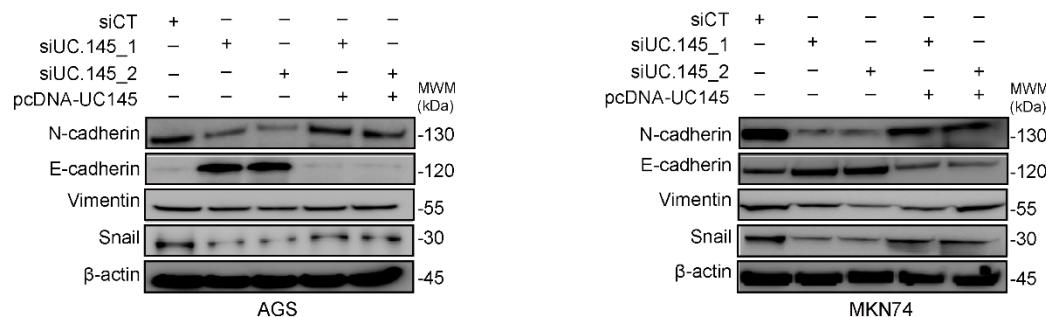

Figure S3. Effect of UC.145 on the EMT process of gastric cancer cells. Western blot analysis of EMT marker protein levels in AGS (**left panel**) and MKN74 (**right panel**) cells transfected with siControl (siCT), siUC.145s, or pcDNA-UC.145.

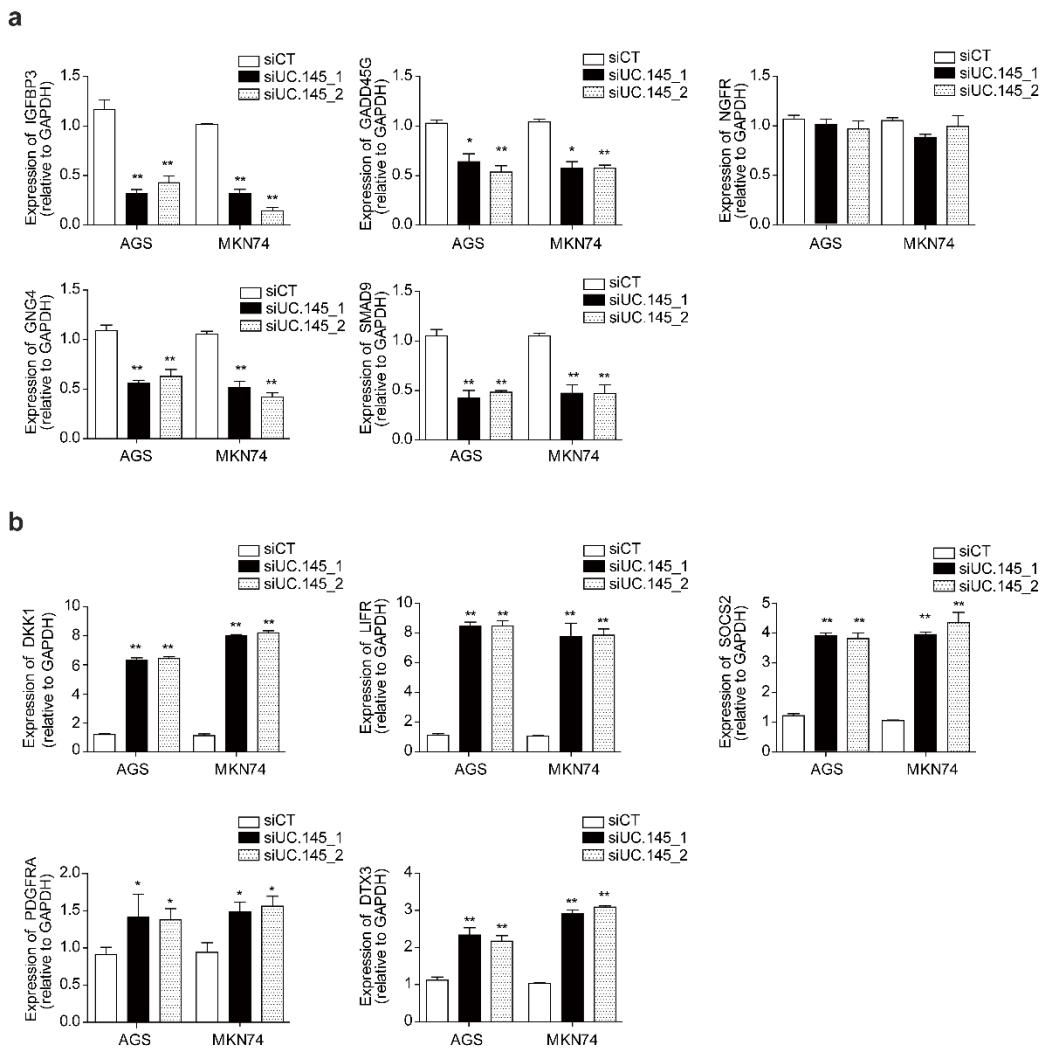

Figure S4. Differentially expressed genes in gastric cancer cells. Relative mRNA expression of (a) five downregulated genes and (b) five upregulated genes in AGS and MKN74 cells determined by Nanostring pathway analysis of putative target genes of UC.145, measured using qRT-PCR. Data are shown as mean \pm SD of three independent experiments (* $p \leq 0.05$; ** $p \leq 0.01$).

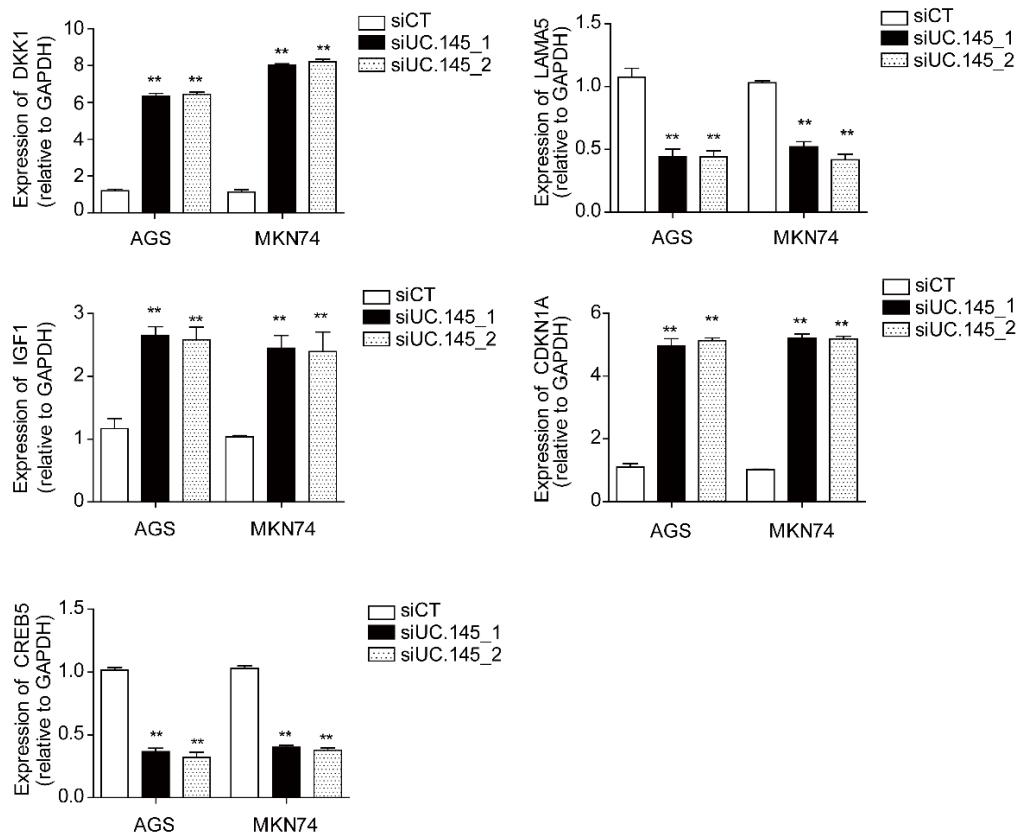

Figure S5. UC.145 target gene identification. Relative mRNA expression of five target genes of UC.145 in AGS and MKN74 cells based on Venn diagram-based analysis of a GEO dataset, measured using qRT-PCR. Data are shown as mean \pm SD of three independent experiments (* $p \leq 0.05$; ** $p \leq 0.01$).

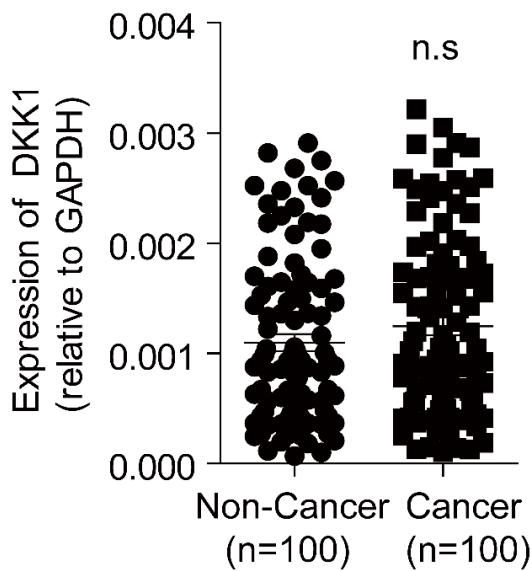

Figure S6. Confirmation of *DKK1* expression in gastric cancer (GC). Relative mRNA expression of *DKK1* in 100 pairs of tissue samples obtained from patients with GC, measured using qRT-PCR. n.s., not significant.

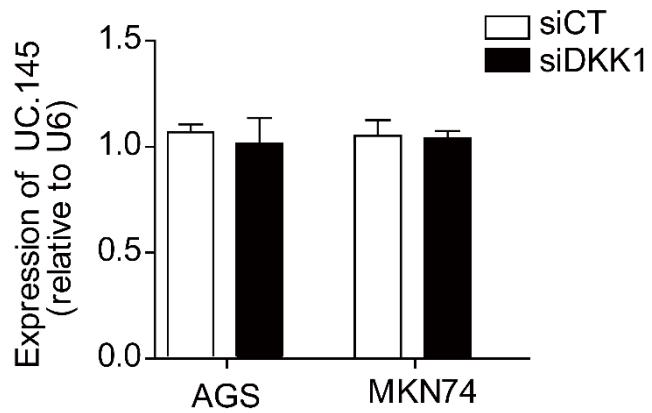

Figure S7. *DKK1* silencing affects UC.145 expression in gastric cancer cells. Relative mRNA expression of UC.145 in AGS and MKN74 cells transfected with siDKK1, measured using qRT-PCR.

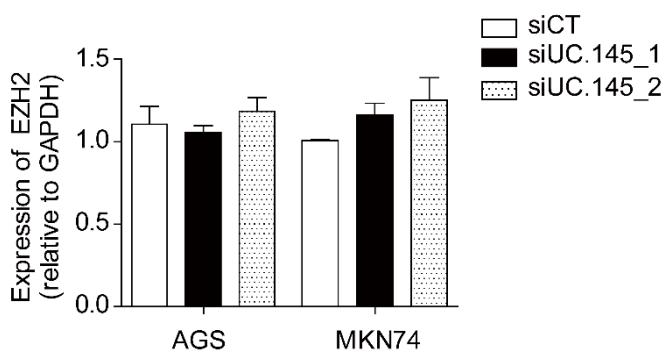

Figure S8. UC.145 affects EZH2 at the transcriptional level in GC cells. Relative mRNA expression of EZH2 in AGS and MKN74 cells, measured using qRT-PCR.

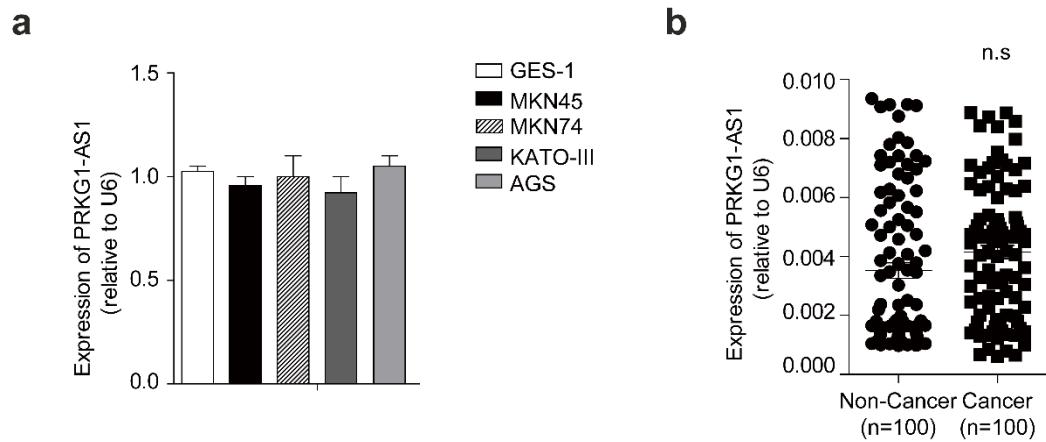

Figure S9. Confirmation of PRKG1-AS1 expression in gastric cancer (GC). **(a)** Relative mRNA expression of PRKG1-AS1 in the normal gastric cells (GES-1) compared with that in GC cells, measured using qRT-PCR; **(b)** Relative mRNA expression of PRKG-AS1 in 100 pairs of tissue samples obtained from patients with gastric cancer, measured using qRT-PCR. n.s., not significant.

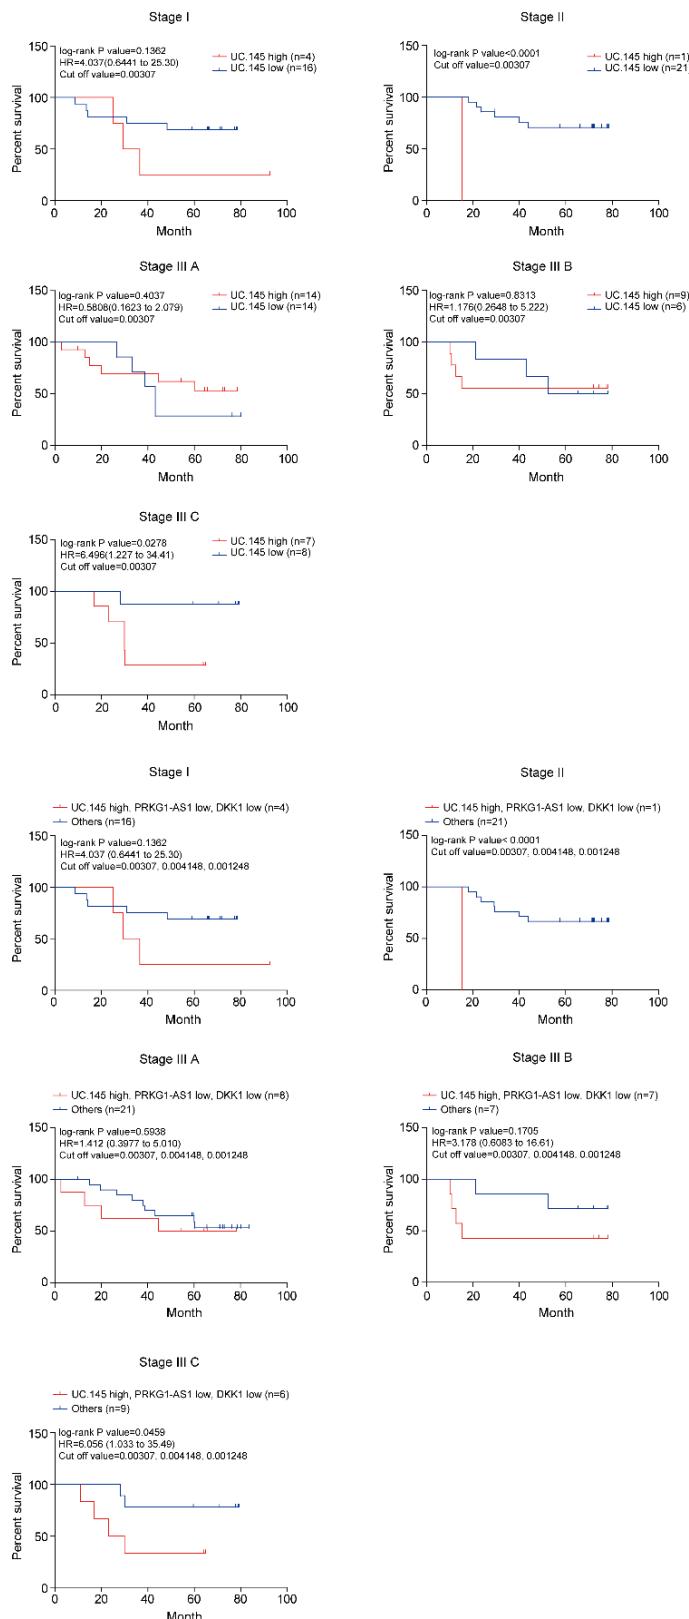

Figure S10. Survival stage analysis. Kaplan-Meier estimates of patient overall survival in each cancer stage using the number of cases in which each gene was either upregulated or downregulated.

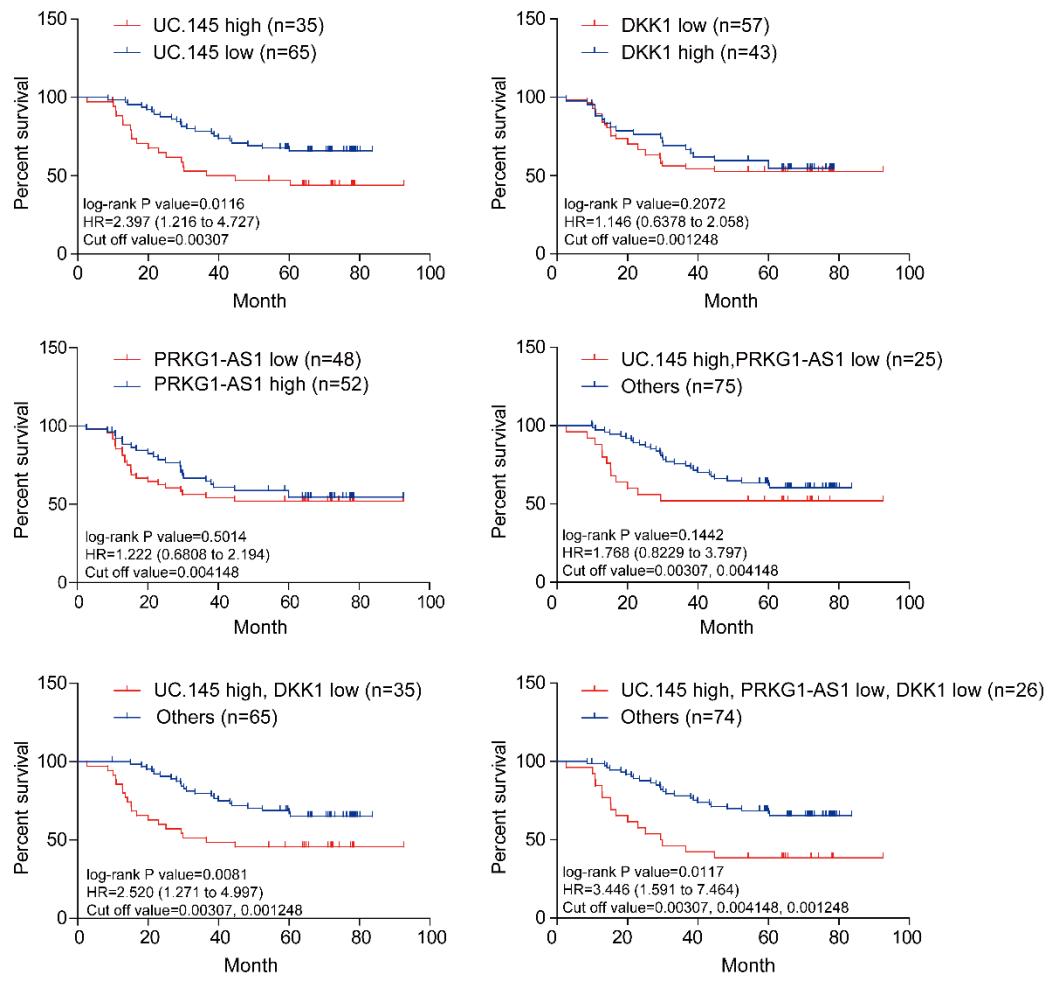

Figure S11. Survival analysis of UC.145, *DKK1*, and PRKG1-AS1. Kaplan–Meier estimates of patient overall survival using the number of cases in which each gene was either upregulated or downregulated.
