

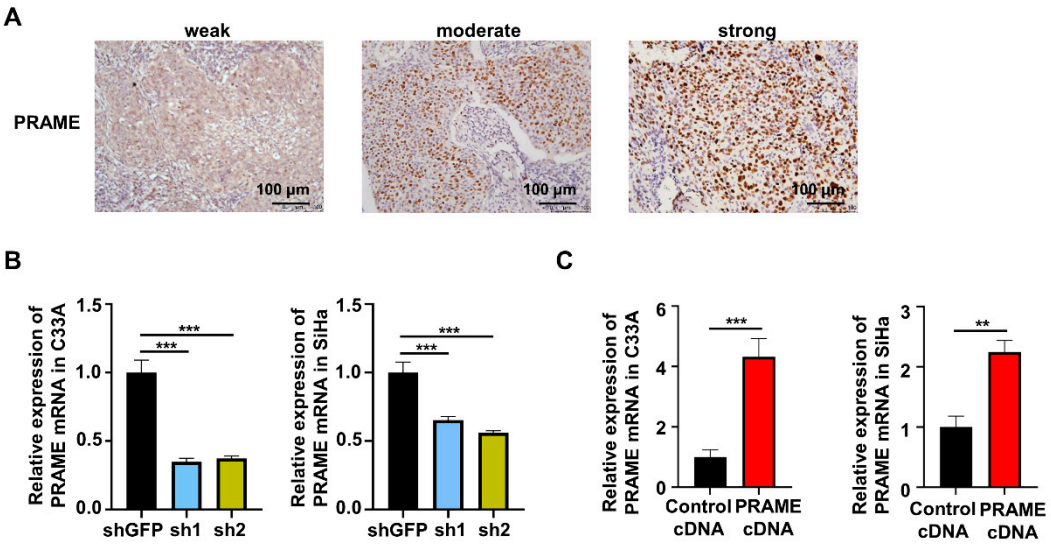

Figure S1 The images of immunostaining, and qRT-PCR confirmation of PRAME -knockdown and -overexpressed cells. (A) The example images of weak, moderate, and strong IHC staining of PRAME (1:200) (B) The transfection efficiency of PRAME knockdown in C33A and SiHa cells were verified by qRT-PCR. (C) The transfection efficiency of PRAME overexpressed in C33A and SiHa cells were verified by qRT-PCR. ** p <0.01, *** p < 0.001.
