

Supplementary Figure S2: MEK inhibitors do not induce stress granule formation.`
A549 cells were treated 24h with PD184352 (PD18) at 10µM or 20min with Sodium Arsenite (NaAsO2) at 0.5mM. Confocal analysis of P-body using anti-DDX6 (Green) and stress granule anti-G3BP1 (Red) antibodies respectively with DAPI nuclear staining (Blue).
