Supplemental Table S3: Variants of uncertain significance by age of first CRC diagnosis.

Abbreviations: eoCRC: early-onset colorectal cancer, aoCRC: average-onset colorectal cancer.

* Among patients with eoCRC, 3 had two VUS, 1 had both a likely pathogenic mutation and VUS, 1 had a pathogenic mutation, likely pathogenic mutation, and VUS, and 5 had a pathogenic mutation and VUS. Among patients with aoCRC, 3 had two VUS, 3 had both a pathogenic mutation and variant of uncertain significance. ** One patient had an increased risk allele of APC. *** Increased risk allele for prostate cancer.
