
Supplemental Table S1. Schedule and content of patient-reported outcome assessments.

| Measure | Construct | BL | D0 | D1-D6 | D7 | D14 | D21 | D30 | D60 | D90 |
|--------------------------|---------------|----|----|-------|----|-----|-----|-----|-----|-----|
| Demographics Survey | Demographics | X | | | | | | | | |
| CCI | Comorbidities | X | | | | | | | | |
| FACT-G | HRQOL | X | X | | X | X | X | X | X | X |
| FACT-G7 | HRQOL | | X* | X | | | | | | |
| PROMIS-29+2 Profile v2.1 | Symptoms | X | X | | X | X | X | X | X | X |
| PRO-CTCAE items | Symptoms | X | X | | X | X | X | X | X | X |

Abbreviations: BL, baseline; CCI, Charlson Comorbidity Index; D, day; FACT-G, Functional Assessment of Cancer Therapy-General; HRQOL, health-related quality of life; PRO-CTCAE, Patient-Reported Outcomes Version of the Common Terminology Criteria for Adverse Events; PROMIS, Patient-Reported Outcomes Measurement Information System. Notes: D0 was day of CAR T-cell infusion.

*A FACT-G7 score was derived from the FACT-G on D0 to facilitate statistical analyses.

Supplemental Table S2. Associations between patient characteristics and patient-reported outcomes at baseline (N=42).

| | Age | | Sex | | Race/ Ethnicity | | Education | | Extra-medullary disease | | High marrow burden | | Bridging therapy | | No. of prior therapies | | Refractory status | | KarMMa eligibility | |

Abbreviations: FACT-G, Functional Assessment of Cancer Therapy-General; HRQOL, health-related quality of life; PROMIS, Patient-Reported Outcomes Measurement Information System.

Notes: T-values and p-values represent results of independent samples t-tests assessing differences in patient-reported outcome scores at baseline by patient characteristics. High marrow burden was defined as ≥50% CD138-positive plasma cells in pre-treatment bone marrow core biopsy. Patient characteristics were coded as follows: Sex: 1=female vs. 0=male; Race/ethnicity: 1=non-Hispanic White vs. 0=other; Education: 1=college degree or more vs. 0=less than college degree; Extramedullary disease: 1=yes vs. 0=no; High marrow burden: 1=yes vs. 0=no; Bridging therapy: 1=yes vs. 0=no; Refractory status: 1=penta-refractory vs. 0=not penta-refractory; KarMMa eligibility: 1=met vs. 0=did not meet. *p<0.01.

Supplemental Table S3. Results of linear mixed models evaluating estimated mean change from baseline for the HRQOL outcomes.
