

Supplementary Figure S1: Representative images of BE biopsies and EMRs. Hematoxylin and eosin stained sections of endoscopic biopsies (A) and an EMR (B). Immunofluorescent imaging of the morphology markers used to select ROIs (A, biopsy) and (D, EMR). ROI segmentation into Pan-CK positive (left) and Pan-CK negative (right) AOIs in biopsies (E) and EMR (F). For C – F, Green: Pan-CK, Red: CD45, Yellow: CD68, and blue: nuclei.
