

Supplementary Table S4. The correlation between percentage of Dkk1-IRS reduction and NACT characteristics

	Group 1	Group 2	Group 3	<i>p</i> value
	Reduction percentage <50%	Reduction percentage 50–75%	Reduction percentage >75%	
Completed therapy				
Yes	20 (40%)	20 (40%)	10 (20%)	0.410
No	3 (20%)	8 (53%)	4 (27%)	
*Therapy protocol				
All therapy included Paclitaxel	11 (42%)	9 (35%)	6 (23%)	0.652
All therapies included Docetaxel	13 (57%)	6 (26%)	4 (17%)	

* Depending on whether Paclitaxel or Docetaxel was used as a taxane agent, two groups of therapy protocols were created. Data are presented as number (N) and percentage (%). *p* value is calculated using the chi-square test.
