

**Supplementary Table S1: Management of postoperative complications**

Complication	Clavien-Dindo Classification	Management
Atrial fibrillation	II	Cardiology evaluation Beta-blocker Anticoagulation
ISGLS PHLF Grade A: Elevation in bilirubin on POD 5	0	Observation
Infected biloma, abscess	IIIa	Antibiotics IR drainage
Below knee DVT	II	Therapeutic anticoagulation
Ileus	I	Bowel rest Electrolyte replacement
Prolonged Ileus	II	Bowel rest Electrolyte replacement
Postoperative hypotension	II	Transient levophed infusion
ISGLS PHLF Grade B: Development of ascites	0	Temporary diuretics
Atrial fibrillation	II	Cardiology evaluation Beta-blocker Anticoagulation
Candida, groin	II	Topical anti-fungal cream
PVT	II	Therapeutic anticoagulation
Hypovolemia, syncope	II	Fluid resuscitation Telemetry
MCA stroke	IVb	ICU Endotracheal intubation Dialysis
PE		Therapeutic anticoagulation
Pelvic abscess	IIIa	Antibiotics IR drainage
ISGLS PHLF Grade A: Elevation in bilirubin on POD 5	0	Observation

ISGLS, international study group of liver surgery; PHLF, post-hepatectomy liver failure; DVT, deep vein thrombosis; PVT, portal vein thrombosis; MCA, middle cerebral artery; PE, pulmonary embolism; IR, interventional radiology; ICU, intensive care unit
