Supplementary Information

Presented results analyzed the following survey questionnaire items:
Pre-test questionnaire items

- Are you considering cystectomy?
- Are you considering intravesical treatment? If so, which one?
- What is the maintenance/surveillance schedule you are considering?

Post-test questionnaire items

- Are you considering cystectomy?
- Are you considering intravesical treatment? If so, which one?
- What is the maintenance/surveillance schedule you are considering?
- Any other management changes outside those asked?
- Which part(s) of the results (biomarker group, recurrence score, progression score) did you use?

Supplementary Figure S1. Scatterplot of Computational Histology Artificial Intelligence (CHAI) reported recurrence and progression risk scores in each case.
