1156	FKNHTSPDVDLGDISGINAS	0,25	0,94

Table summarizes the B cell epitopes predicted by BCEPS in SARS-CoV-2 surface glycoprotein S (YP_009724390.1). Predictions were obtained selecting a peptide size of 18 and the option to "Extend B-cell Epitopes". B cell epitopes located outside of the ectodomain or bearing n-glycosylation sites were sorted out.
