

Supplementary materials:

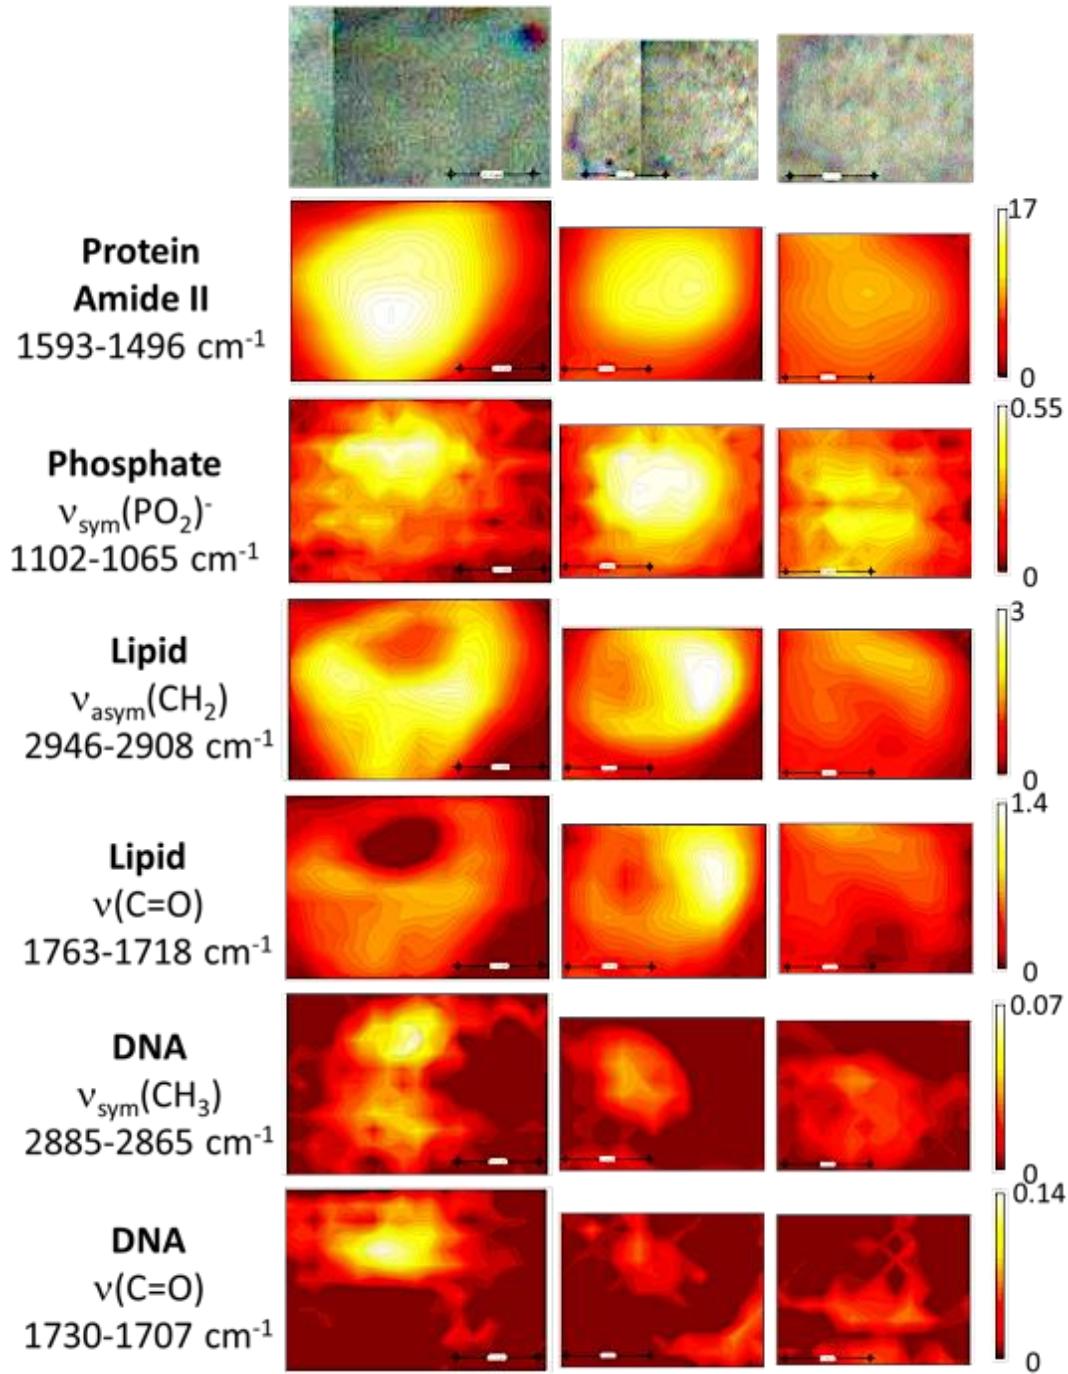

**Figure S1:** FTIR images (integration range shown on the left column) of the three other host cells at 24 hpi. Scale bars = 10  $\mu\text{m}$ .

## 24 h Cont'l

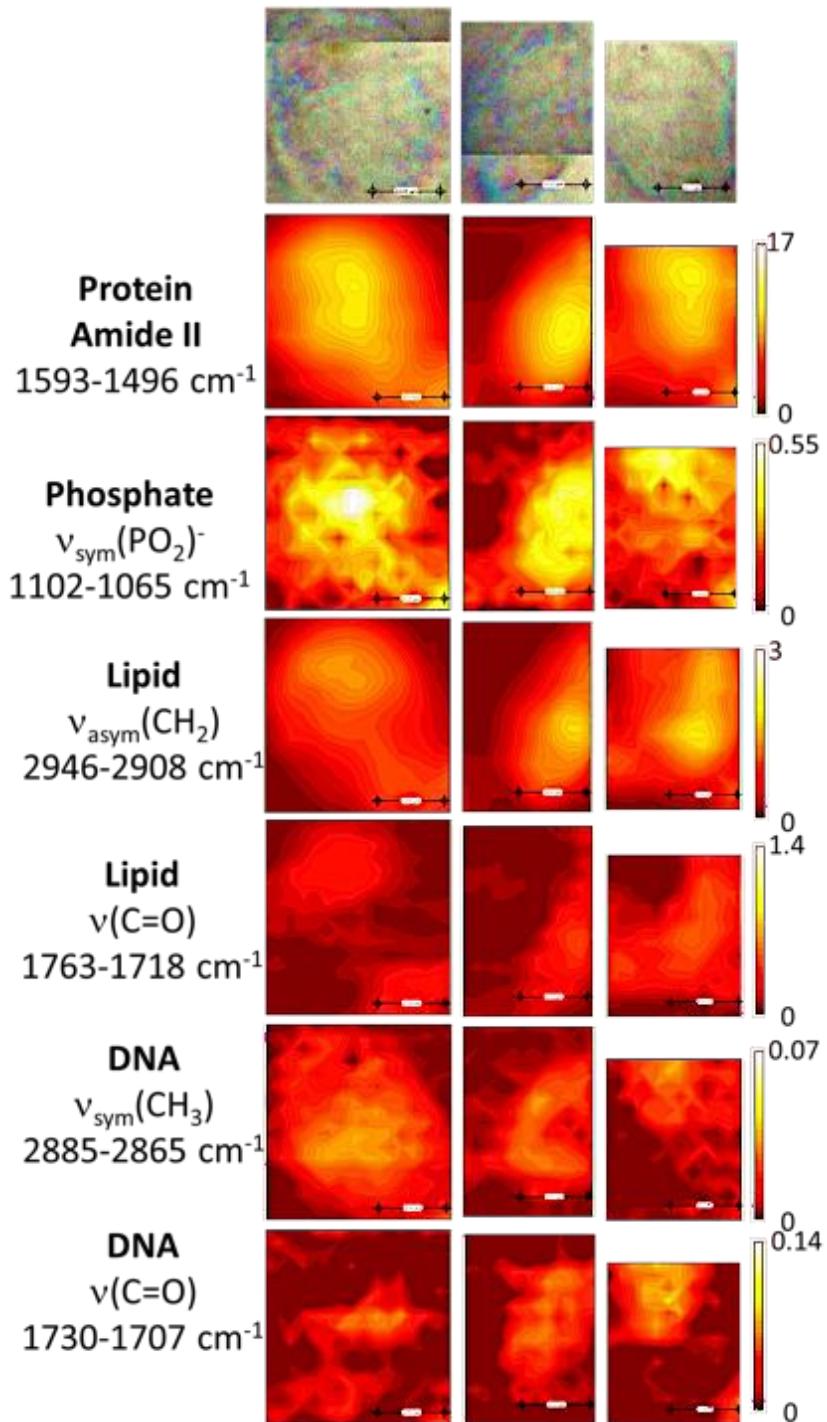

**Figure S2:** FTIR images (integration range shown on the left column) of the three other control cells at 24 h. The visible images were not collected for two cells. Scale bars =  $10\text{ }\mu\text{m}$ .

48 hpi

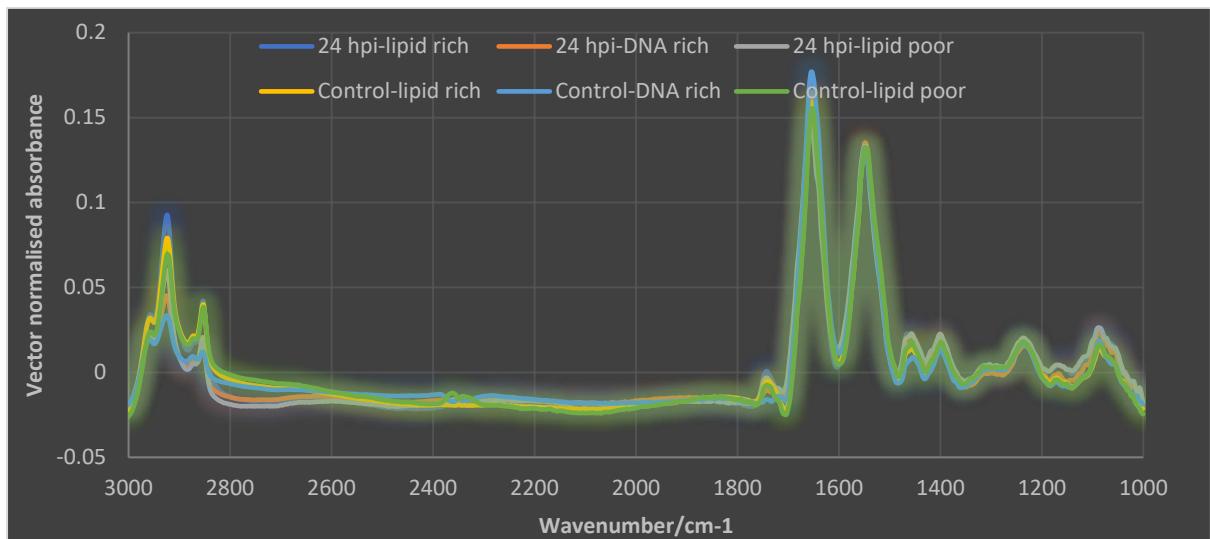

**Figure S3:** FTIR images (integration range shown on the left column) of the three other cells at 48 hpi. Scale bars = 10  $\mu\text{m}$ .

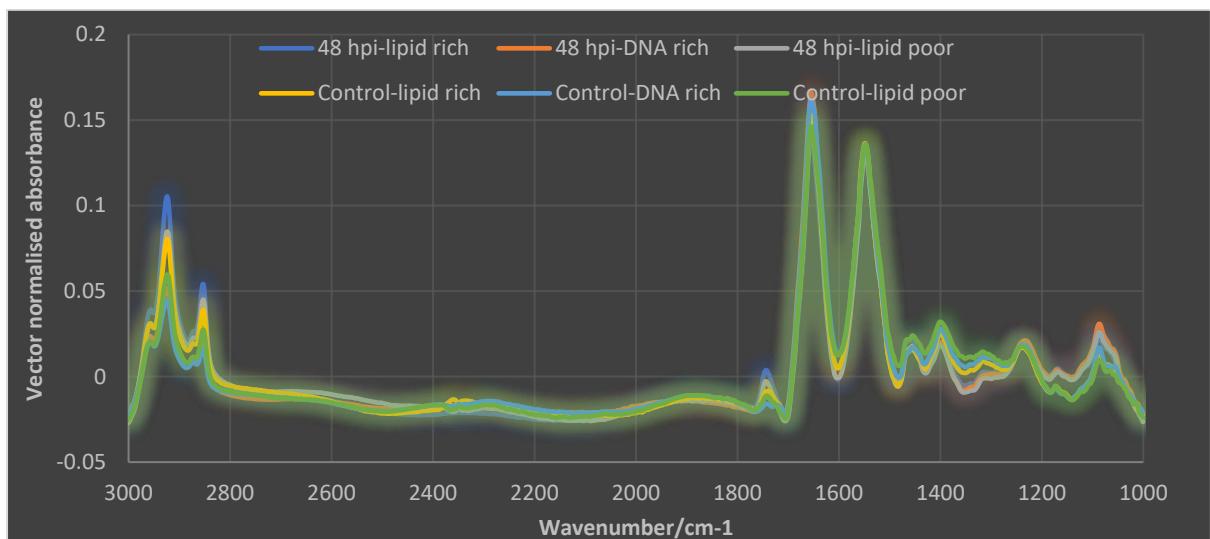

## 48 h Cont'l

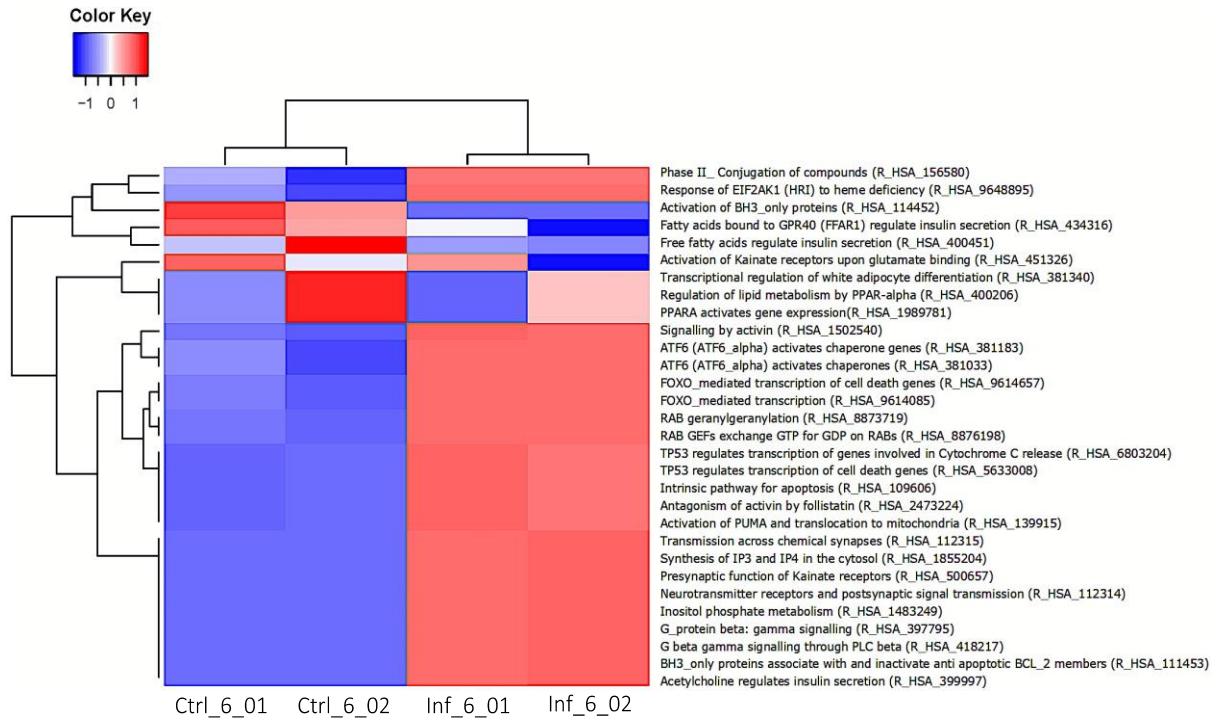

**Figure S4:** FTIR images (integration range shown on the left column) of the three other control cells at 48 h. Scale bars = 10  $\mu\text{m}$ .

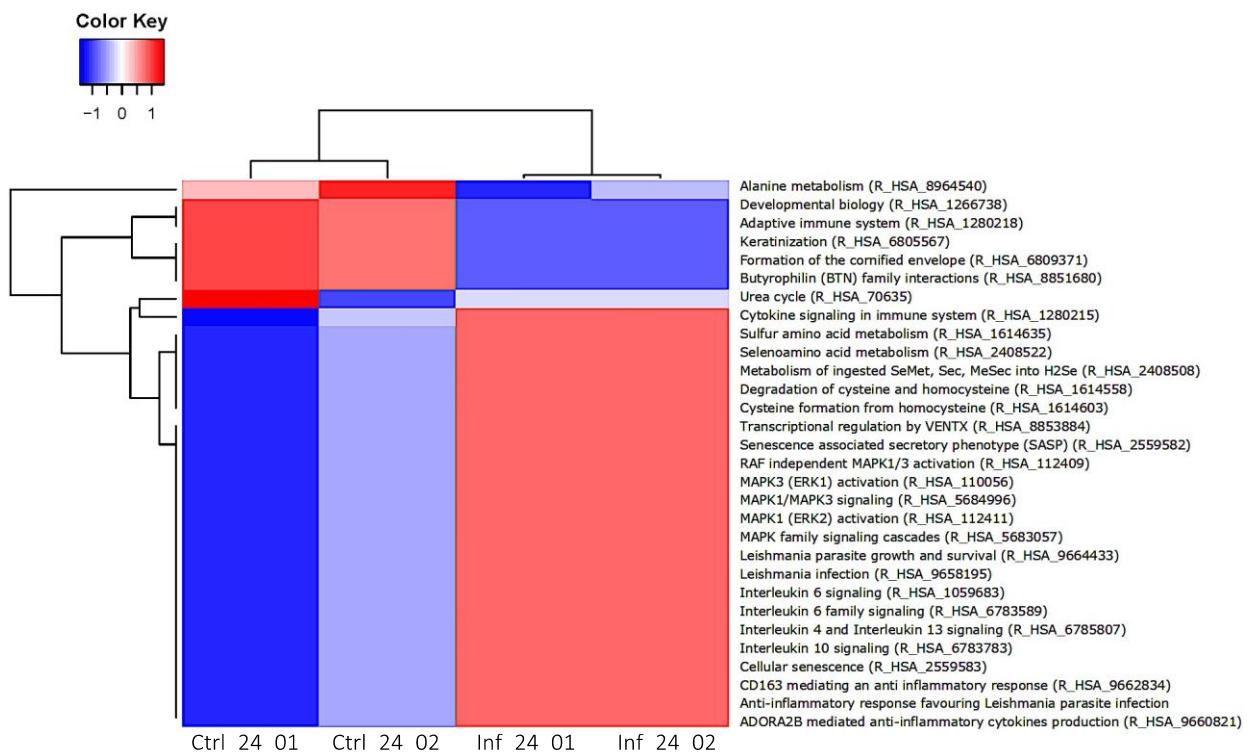

**Figure S5:** The extracted spectra of infected and control cells at 24 hpi from the lipid-rich, DNA-rich, and lipid-poor regions.

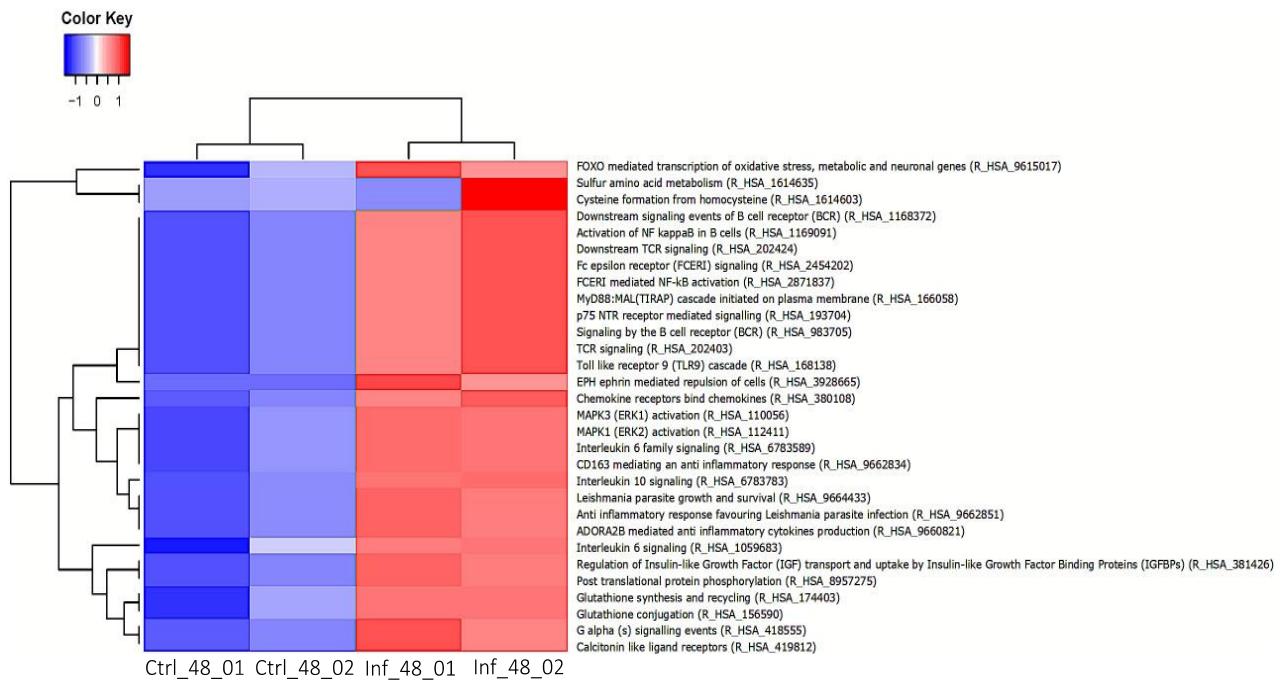

**Figure S6:** The extracted spectra of infected and control cells at 48 hpi from the lipid-rich, DNA-rich, and lipid-poor regions.

**Figure S7.** The top 30 pathways most significantly activated (red) or inactivated (blue) at 6 hpi by *T. gondii*. Columns represent replicates of the samples and rows represent individual pathways. The phylogenetic tree above the heatmap demonstrates the hierarchical clustering of the samples. The relationships between the pathways are shown on the left tree.

**Figure S8.** The top 30 pathways most significantly activated (red) or inactivated (blue) at 24 hpi by *T. gondii*. Columns represent replicates of the samples and rows represent individual pathways. The phylogenetic tree above the heatmap demonstrates the hierarchical clustering of the samples. The relationships between the pathways are shown on the left tree.

**Figure S9.** The top 30 pathways most significantly activated (red) or inactivated (blue) at 48 hpi by *T. gondii*. Columns represent replicates of the samples and rows represent individual pathways. The phylogenetic tree above the heatmap demonstrates the hierarchical clustering of the samples. The relationships between the pathways are shown on the left tree.

**Table S1.** Differentially expressed genes commonly detected at 6-, 24-, and 48-hours post *Toxoplasma gondii* infection.

No	Gene_ID	Gene Symbol	Log <sub>2</sub> FC
