

Supplementary Figure S1. Putative secreted factors that were found to be expressed alike in the PE-infused model. A B mRNA levels from either heart tissue (A) or tumor (B) of the indicated genes were measured by qRT-PCR. Data are presented as relative expression compared with control determined as 1. Data are presented as mean \pm SEM and analyzed by multiple Student t tests. * $p < 0.05$. ** $p < 0.01$. *** $p < 0.001$.
