

**A****B****C**

**Figure S1.** Richness (Observed and Chao1) and diversity (Shannon and Simpson) indexes for the gut microbiota. (a) Control (CON) and undernourished (UND) C57BL/6 mice. (b) Control (CON) and cotrimoxazole-treated undernourished (UND-SXT) C57BL/6 mice. (c) Control (CON), undernourished (UND), and cotrimoxazole-treated undernourished (UND-SXT) C57BL/6 mice.

**Table S1.** ANCOM-BC analysis showing W test statistic (mean difference/SE), p-value and FRD p-value for differently significant genus in the gut microbiota of CON (n = 6), UND (n = 7), and UND+SXT (n = 6) C57BL/6 mice. \* Increased in UND+SXT mice when compared to CON and UND mice; \*\* reduced in UND+SXT mice when compared to CON and UND mice.

Family	Genus	W	p-value	FDR p-value
