

Supplementary Figure S3. Representative FACS plots with gating strategy. Data is presented as % of all living single cells of ears in either F8-SIP or F8-VEGF-C treated mice. Gating strategy for (a) CD45⁺ and (b) CD4⁺ resp. CD8⁺ T cells. Representation of (c) F4/80⁺/CD11b⁺ macrophages, (d) CD11c⁺/MHCII⁺ dendritic cells and (e) Foxp3⁺/CD4⁺ regulatory T cells.
