

Supplementary information, Figure S1

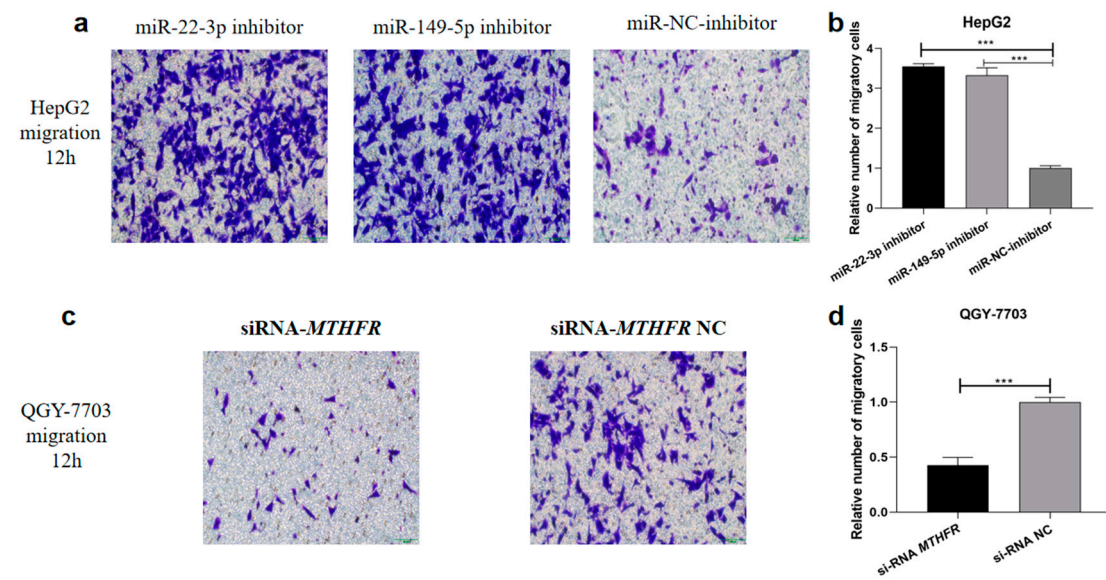

Figure S1 Additional representative images (a) and bar graphs (b) depicting the migration ability of HepG2 after miR-22-3p inhibitor (100 nM), miR-149-5p inhibitor (100 nM) or miR-NC (100 nM) transfection. Additional representative images (c) and bar graphs (d) depicting the migration ability of QGY-7703 after siRNA-*MTHFR* (100 nM), siRNA-*MTHFR* NC (100 nM). Data are presented as mean $\pm$ S.D. (n=6) and analyzed by a two-tailed unpaired t-test ($\times 200$ magnification, ***P<0.001).
