

Annex 1

Information collection format on Climate Sensitive Diseases (CSD) according to the Climate stressed areas in Bangladesh

Name of Climate Stressed Area	Name of CSD	Season		Causes	Degree of Severity		
		Peak	Off		Mild	Moderate	Severe

Pre-/Post-test Questionnaire
Training on Climate Change and Health for Health Professional

All questions carry equal marks (Total 20)

Place:

Date:

Name:

Designation:

HCF code no (if any):

1. What do we mean by weather and climate?
2. What are the greenhouse gases?
3. What has the form of climate change impact already been observed in BD?
a. Hotter summer b. Increased River flow c. Crop failure d. All of the above
4. What is the health impact of climate changes in Bangladesh.
5. Mention some climate sensitive diseases commonly seen in our country.
6. Changes in environmental conditions, like temperature, humidity, rainfall rarely modify the transmission patterns of vector-borne diseases. Please choose from the followings:
a. True b. False
7. Malaria is a parasitic infection transmitted by Anopheline mosquitoes. It causes an estimated 219 million cases globally, and results in more than how many deaths every year? (Tick the right answer).
a. 300,000 b. 400,000 c. 500,000
8. Dengue outbreak in Dhaka how many percentages of dengue related death in 2019? (Tick the right answer).
a. 60 % b. 70% c. 77%
9. Mentioned some Climate Change-Induced Water-Related Diseases in Bangladesh.
10. Which are essential to combat an epidemic situation of climate-sensitive water borne disease?
a. Avail the central warehouse for stockpiling of recommended drugs, ORS, vaccines, and other emergency supplies.

- b. Identify emergency hospital bed reserves, and drug distribution centers.
 - c. Form the trained core committees / teams as well as request assistance from the Mobile Control Teams.
 - d. All the above
11. Consumption of inadequate quantity and/or quality of food may cause undernutrition/obesity where non-communicable diseases from increased incidence of infections and stress may be the dietary impacts of changing climate. Please choose from the followings:
- a. True b. False
12. What are the elements of food security. (tick the correct ones)
- a: Food availability b: Food access c: Food Quality d: Food utilization e: Food stability
13. What are the diseases occurring due to climate change resulting air pollution
14. Climate change has an impact on mental health.
- a) True b) False
15. What do you mean by health vulnerability?
16. Spell out the following abbreviations (Any four)
- | | |
|-----------|---------|
| A. NAPA: | UNFCCC: |
| B. BCCRF: | BCCSAP: |
| C. BCCTF: | IPCC: |
17. Differentiate between adaptation and mitigation from the perspective of climate change.
18. Define Community Based Adaptation (CBA). What are the specific sectors for CBA measures considering vulnerability to climate-related stresses?
19. Write two actions/steps for proper management of health outcome of climate change
20. Which of the followings are the key challenges in managing health outcome of climate change? (Tick the correct ones)
- a. Changing patterns of disease and mortality as well as the extreme events
 - b. Inadequate hospital emergency preparedness and response plan
 - c. Lack of intersectoral coordination and cooperation, and inappropriate policy responses
 - d. All the above
