

| Climate | Description |
|----------|--|
| (A)C(m) | Semiwarm humid of group C, average annual temperature greater than 18 °C, temperature of the coldest month less than 18 °C, temperature of the hottest month greater than 22 °C. Summer rains, with precipitation of the driest month greater than 40 mm; percentage of winter rain from 5 to 10.2% of the annual total. |
| (A)C(w2) | Semiwarm subhumid of group C, average annual temperature greater than 18 °C, temperature of the coldest month less than 18 °C, temperature of the hottest month greater than 22 °C. Precipitation of the driest month less than 40 mm; summer rains with Lang's index greater than 55 and percentage of winter rain from 5 to 10.2% of the annual total. |
| BS1kw | Semiarid, temperate, average annual temperature between 12 and 18 °C, temperature of the coldest month between -3 and 18 °C, temperature of the hottest month less than 22 °C. Summer rains and percentage of winter rain from 5 to 10.2% of the total annual. |
| C(w2) | Temperate, subhumid, average annual temperature between 12 and 18 °C, temperature of the coldest month between -3 and 18 °C and temperature of the hottest month below 22 °C. Precipitation in the driest month less than 40 mm; summer rains with a Lang's index greater than 55 and percentage of winter rains from 5 to 10.2% of the annual total. |
| C(wo) | Subhumid temperate, average annual temperature between 12 and 18 °C, temperature of the coldest month between -3 and 18 °C and temperature of the hottest month below 22 °C. Precipitation in the driest month less than 40 mm; summer rains with a Lang's index of less than 43.2 and percentage of winter precipitation from 5 to 10.2% of the annual total. |
| Cb'(w2) | Subhumid semicold with a long cool summer, average annual temperature between 5 and 12 °C, temperature of the coldest month between -3 and 18 °C, temperature of the hottest month below 22 °C. Precipitation in the driest month less than 40 mm; summer rains and percentage of winter rain from 5 to 10.2% of the annual total. |
| (A)C(w1) | Semi-warm sub-humid of group C, average annual temperature greater than 18 °C, temperature of the coldest month less than 18 °C, temperature of the hottest month greater than 22 °C. Precipitation of the driest month less than 40 mm; summer rains with Lang's index between 43.2 and 55 and percentage of rain from 5 to 10.2% of the annual total. |
| BS1hw | Semiarid, semiwarm, average annual temperature greater than 18 °C, temperature of the coldest month less than 18 °C, temperature of the hottest month greater than 22 °C. Summer rains and percentage of winter rain from 5 to 10.2% of the annual total. |
| C(w1) | Subhumid temperate, average annual temperature between 12 and 18 °C, temperature of the coldest month between -3 and 18 °C and temperature of the hottest month below 22 °C. Precipitation in the driest month less than 40 mm; summer rains with Lang's index between 43.2 and 55 and percentage of winter rain from 5 to 10.2% of the annual total. |
