

**Table S2.** Specimens, haplotypes and haplogroups COI of *S. lovenii*, *S. tubulosa* and *S. princeps* visualized at haplotypes net (Figure 3B). Sequences excluded from analysis of COI-haplotypes denoted in table as “exc”. Morphotypes for *S. lovenii*: medusoid, medusa, attached medusa, abnormal medusoid, unknown morphotype.

Species and haplotype	Specimens
<i>S. lovenii</i> haplogroup 1	<b>medusoid:</b> S34, H117, H119, H130, H139, H152, H332, H346, H347, H349 <b>attached medusa:</b> H149, H150, H159, H163, H337 <b>abnormal medusoid:</b> H148, H182, H336, H339, H341 <b>unknown:</b> MSU1, MSU2, MSU3, MSU4, MSU6, S8, S9, S10, H93, H103, H104, H107, H108, H109, H111, H112, H114, H116, H118, H120, H135, H136, H138, H142, H143, H145, H160, H162, H164, H166, H169, H172, H174, H175, H177, H178, H179, H184, H237, H250, H252, H256, H257, H258, H261, H262, H263, H264, H266, H267, H268, H269, H270, H271, H333, <b>exc:</b> S6, S7, S29, S38, H106, H137, H154, H158, H170, H171, H173, H235, H289, H334, H335, H338, H340, H348
	<b>medusoid:</b> H90
	<b>abnormal medusoid:</b> H254, H259, H265
