Table S2. Relationship between ultrasound and histopathological measurement of the degree of endometrial cancer (MI) infiltration

	pMI		
uMI	pMI < 50%	pMI ≥ 50%	Total
uMI < 50%	60	16	76
uMI ≥ 50%	11	29	40
Total	71	45	116

Legend: uMI - ultrasound measured the depth of invasion of the uterine muscle; pMI - pathomorphologically measured the depth of invasion of the uterine muscle (Chi-square test, $p < 0.00001$).
