

A)

B)

Supplementary Figure S3. Biomarker level variations following ERT treatment in a 18-year-old male GD type 1 patient with p.N370S/D409H mutations. A) Concentration variation post-ERT for lyso-Gb₁, lyso-Gb₁ analogs +32, +30, +16 (A), +16 (B), +14, +2, -12 (A) and (B), -26, and -28 Da, as well as polycyclic analogs 390, and 362 Da post-ERT; B) Concentration variation levels post-ERT for polycyclic lyso-Gb₁ 394 and 366 Da.
