

A)

B)

Supplementary Figure S2. Biomarker level variation following ERT treatment in a 55-year-old male GD type 1 patient p.N370S/D409H mutations. A) Concentration variation levels post-ERT for lyso-Gb₁, lyso-Gb₁ analogs +32, +30, +16 (A), +16 (B), +14, +2, - 2 (A) and (B), -26, and -28 Da, as well as polycyclic analogs 362, and 390 Da; B) Concentration variation levels post-ERT for polycyclic lyso-Gb₁ 366 and 394 Da.
