

Supplementary table The morphological characteristics of the 50 randomly selected lesions

Morphological feature	Number
Internal echo	
Homogeneous	2
Not homogeneous	48
Mass margin	
Circumscribed	3
Not circumscribed	47
Mass shape	
Round or oval	2
Irregular	48
Composition	
Cystic-solid mixture	1
Solid, dominantly solid	49
Echogenicity	
Isoechoic	1
Hypoechoic	49
