

Supplemental Digital Content S1. Keyword list (text document)

The identification of patients eligible for inclusion in the study involved a keyword search in our in-house structured database. The keyword list is provided in this text document as supplemental material to the manuscript "Diffusion-Weighted Imaging for Skin Pathologies of the Breast – A Feasibility Study". Since the medical reports were in German language, keywords were chosen mostly in the German language as well.

- Infiltration
- Pagetoid
- Paget
- Morbus Paget
- inflammatorische
- Cutis Infiltration
- Cutis
- Cutisverdickung
- Verdickte Cutis
- Haut
- Skin
