

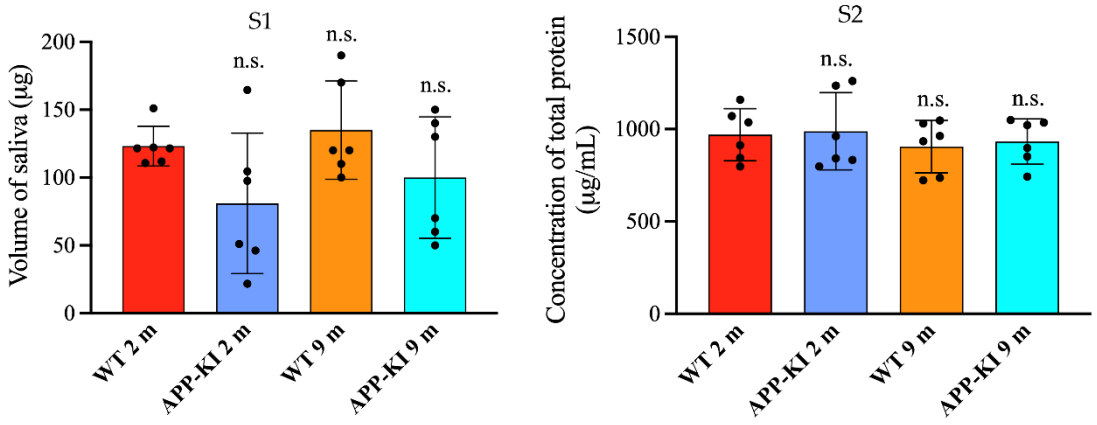

Figure S1 is Salivary secretion in amyloid precursor protein knock-in (APP-KI) and wild-type (WT) mice. Figure S2 is total protein concentration in the saliva of amyloid precursor protein knock-in (APP-KI) and wild-type (WT) mice. Salivary secretion and total salivary protein concentrations were compared between APP-KI and WT mice at 2 and 9 months of age. Data were analyzed using the Kruskal–Wallis test, followed by the Steel–Dwass post-hoc test for multiple comparisons. Data are presented as mean ± SD. n = 6 per group. No significant differences were observed among the groups ($p > 0.05$).
