Supplementary Table S4

An Evidence Map of Pupillary Assessment in a Preselected Acute-Care Literature Archive

Complete index of 871 historical report records. Current dispositions: 355 core, 15 qualitative/linkage only, 497 criteria exclusions, three unresolved-source closures and one duplicate alias. Full current reasons, source locations, adult restrictions and historical fields are preserved in the accompanying searchable HTML and machine-readable records.

The 30 October eligibility-only audit retained 237 of the 239 acquisition-unestablished reports and excluded FT-0120 (EX07) and UF-43BA3EE5 (EX02). Historical human review is preserved; 21 reports received targeted source rereading and 218 had preserved-evidence audits. This is not a new full-text read of all 239 reports. FT-0133 Figure 3 confirms age >=65; its eligibility is unchanged.

FT-0671 and FT-0691 remain core with numerical-reuse restrictions. FT-1174 is BOX report linkage only. Acquisition Not established is not itself an exclusion or a verified absence of a method. Complete restricted adult subgroups must not be represented by whole mixed-age parent results.

Report ID	Author / year	Title	Current disposition	Identifiers
FT-0001	Wiefhoff, Jan; 2026	Incidence and impact of intracranial complications in patients undergoing extracorporeal membrane oxygenation treatment	Exclude; EX07	PMID 42382653 DOI 10.1016/j.bas.2026.106123
