

Supplement 3: Content structure of e-learning

Individual e-learning modules can be accessed by clicking on them in the drop-down menu. A further drop-down menu can be used for individual sub-chapters within the modules, ensuring clarity and quick navigation through the e-learning. Users can choose to follow this order, but it is not mandatory. The arrows in the illustration point to the respective learning objectives of the modules or sub-chapters. Links between sub-chapters and commonalities in the structure are highlighted by arrows in the new section.
