Enhanced natural regeneration potential of sessile oak in Northern Hungary – role of artificially increased density of insectivorous birds

by Csaba Béla Eötvös, Ágnes Fürjes-Mikó, Márton Paulin, Csaba Gáspár, Marcell Kárpáti, Anikó Hirka and György Csóka

Table S6. The catches of the lepidopteran groups with different baited funnel traps at the sample and control sites.

Group	Site	NAA	FLO
Noctuoidea	Sample	4,077	1,177
	Control	4,091	1,390
Noctuidae	Sample	3,948	1,130
	Control	4,036	1,364
Erebidae	Sample	129	47
	Control	55	26
Geometridae	Sample	35	87
	Control	22	69
Thyatiridae	Sample	24	0
	Control	2	0
Sphingidae	Sample	4	0
	Control	2	0
Drepanidae	Sample	1	0
	Control	0	0
Diurna	Sample	1	1
	Control	0	1
Microlepidoptera	Sample	276	49
	Control	146	37
Lepidoptera	Sample	470	184
	Control	227	133
