

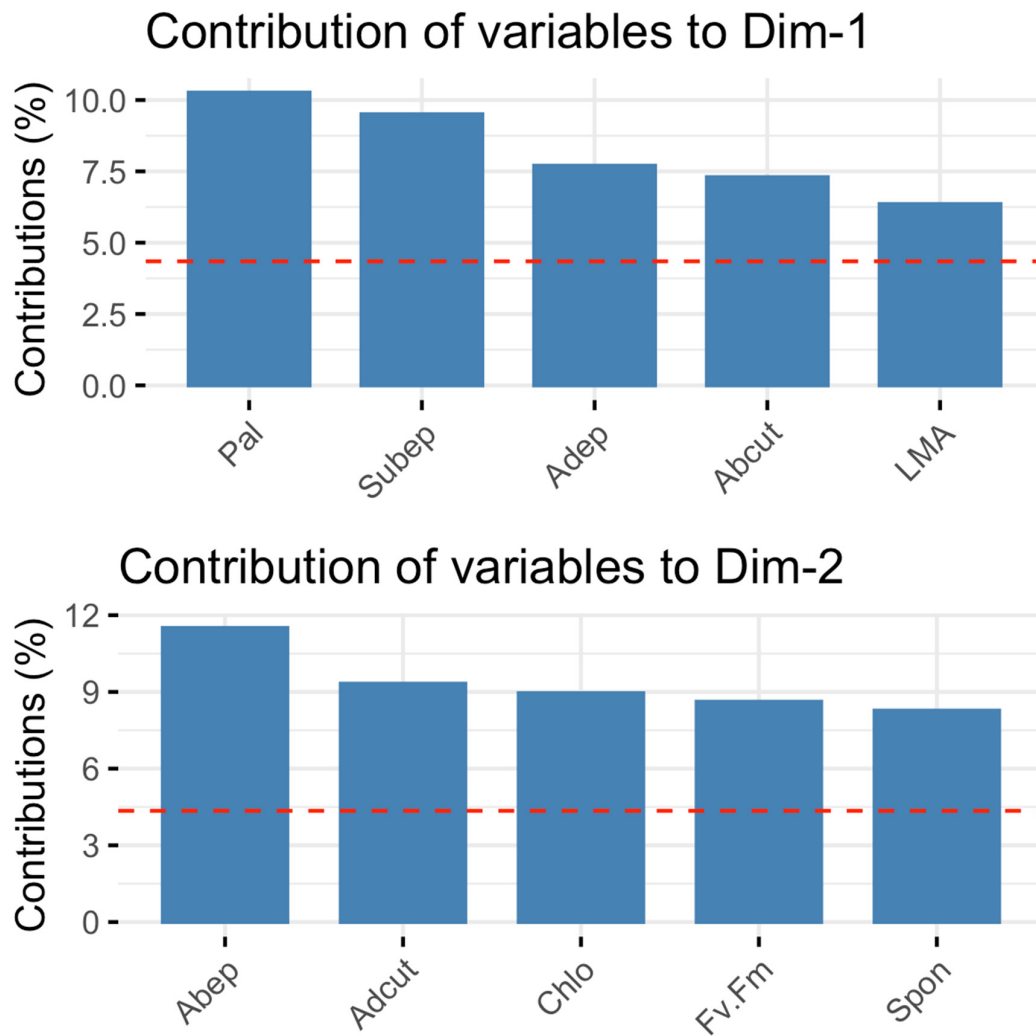

Figure S6. Percentage contribution of *Schinus terebinthifolia* leaf traits to each dimension (Dim 1 and Dim 2) of the Principal Component Analysis (PCA). Pal – palisade parenchyma; Subep – subepidermal layer; Adep – adaxial epidermis; Abcut – abaxial cuticle; LMA – leaf mass per unit area; Abep – abaxial epidermis; Adcut – adaxial cuticle; Chlo – total chlorophyll content; Fv.Fm – maximum quantum yield of photosystem II; Spon – spongy parenchyma.
