Table S1. Relative expression of *bdh1* gene in *S. cerevisiae* W141 at 4.52 mg/L dissolved oxygen level.

Strain	CT value		ΔCT	ΔΔCT	$2^{-\Delta\Delta CT}$
	CT-*bdh1*	CT-18S			
S. cerevisiae W141	34.21 ± 0.14[a]	24.73 ± 0.16[a]	9.48	0	1b
S. cerevisiae W141 with dissolved oxygen	31.25 ± 0.12	22.16 ± 0.11	9.09	-3.09	1.31a

Note: table vertical was multiple comparisons. [a] Values meant of three determinations with standard deviation (±) CT-18S indicated 18S-rDNA internal reference gene, a and b are the results obtained by SPSS significance analysis.
