MQL(total) – method quantification limit (microwave-assisted mineralization); MQL(ext) – method quantification limit (ultrasound-assisted extraction).

**Table S3.** The ICP OES analysis of certified reference materials (CRMs): hardwood biomass material (SRM 2790), tobacco leaves (OBTL-5, PVTL-6), mushroom powders (IPE-120, CS-M-3), prepared using the procedure of microwave-assisted acid mineralization. All results presented as mean $\pm$ SD (n=3), except where is noted.

Inorganic Constituents in Hardwood Biomass Material (SRM® 2790, NIST, USA)				Oriental Basma Tobacco Leaves (OBTL-6, INCT, Poland)			Polish Virginia Tobacco Leaves (PVTL-6, INCT, Poland)			Mushroom ( <i>Agaricus bisporus</i> ) (IPE-120, WEPAL, Netherlands)			Microelements in Mushroom Powder (CS-M-3, INCT, Poland)
