

Supplementary Table S1. List of local mulberry genotypes from Slovenia and Hungary planted in the mulberry collection of the Faculty of Agriculture University Maribor with location of their origin, geographic coordinates and detailed data along with the list and specification of reference sericultural and fruit varieties. The identification No. is defined by the abbreviation of the region (Slovenia) or county (Hungary). Slovenia: SE- Southeastern region, SM- Submediterranean region, SP- Subpannonean region; Hungary: BA- Baranya, BE- Bekes, GMS- Győr-Moson-Sopron, PE- Pest, SO-Somogy, TO-Tolna, VE-Veszprem, ZA-Zala;
