Loss of mitochondrial genetic diversity despite population growth: the legacy of past wolf population declines

Isabel Salado¹, Michaela Preick², Natividad Lupiáñez-Corpas¹, Alberto Fernández-Gil¹, Carles Vilà¹,
Michael Hofreiter², Jennifer A. Leonard¹

Figure S1. Distribution of MT haplotypes in historical Iberian wolves. Private to historical wolves (filled circles), shared with modern wolves (empty circles) and unique haplotype in Sierra Morena (red circles). Current wolf distribution is shaded in blue, following [34,35]. Dotted line marks the Douro river, which has limited distinct management strategies.
