Cis−elemant_Name
Cis−elemant_Annotation
60K protein binding site
auxin−responsive element
binding site of AT−rich DNA binding protein (ATBP−1)
cis−acting element involved in cell cycle regulation
cis−acting element involved in defense and stress responsiveness
cis−acting element involved in gibberellin−responsiveness
cis−acting element involved in light responsiveness
cis−acting element involved in low−temperature responsiveness
cis−acting element involved in phytochrome down−regulation expression
cis−acting element involved in salicylic acid responsiveness
cis−acting element involved in the abscisic acid responsiveness
cis−acting regulatory element
cis−acting regulatory element essential for the anaerobic induction
cis−acting regulatory element involved in auxin responsiveness
cis−acting regulatory element involved in circadian control
cis−acting regulatory element involved in light responsiveness
cis−acting regulatory element involved in seed−specific regulation
cis−acting regulatory element involved in the MeJA−responsiveness
cis−acting regulatory element involved in zein metabolism regulation
cis−acting regulatory element related to meristem expression
cis−acting regulatory element related to meristem specific activation
cis−regulatory element involved in endosperm expression
common cis−acting element in promoter and enhancer regions
core promoter element around −30 of transcription start
element for maximal elicitor−mediated activation (2copies)
element involved in differentiation of the palisade mesophyll cells
enhancer−like element involved in anoxic specific inducibility
gibberellin−responsive element
gibberellin−responsive element and part of a light responsive element
involved in endosperm−specific negative expression
light responsive element
MYB binding site involved in drought−inducibility
MYB binding site involved in flavonoid biosynthetic genes regulation
MYB binding site involved in light responsiveness
MYBHv1 binding site
part of a conserved DNA module array (CMA3)
part of a conserved DNA module involved in light responsiveness
part of a light response element
part of a light responsive element
part of a light responsive module
part of a module for light response
part of an auxin−responsive element
part of gapA in (gapA−CMA1) involved with light responsiveness
protein binding site
wound−responsive element
