GeneID

Cis−elemant_Name

Cis−elemant_Annotation

- 60K protein binding site
- auxin−responsive element
- binding site of AT−rich DNA binding protein (ATBP−1)
- cis−acting element involved in cell cycle regulation
- cis−acting element involved in defense and stress responsiveness
- cis−acting element involved in gibberellin−responsiveness
- cis−acting element involved in light responsiveness
- cis−acting element involved in low−temperature responsiveness
- cis−acting element involved in phytochrome down−regulation expression
- cis−acting element involved in salicylic acid responsiveness
- cis−acting element involved in the abscisic acid responsiveness
- cis−acting regulatory element
- cis−acting regulatory element essential for the anaerobic induction
- cis−acting regulatory element involved in auxin responsiveness
- cis−acting regulatory element involved in circadian control
- cis−acting regulatory element involved in light responsiveness
- cis−acting regulatory element involved in seed−specific regulation
- cis−acting regulatory element involved in the MeJA−responsiveness
- cis−acting regulatory element involved in zein metabolism regulation
- cis−acting regulatory element related to meristem expression
- cis−acting regulatory element root specific
- cis−regulatory element involved in endosperm expression
- common cis−acting element in promoter and enhancer regions
- core promoter element around −30 of transcription start
- element for maximal elicitor−mediated activation (2copies)
- element involved in differentiation of the palisade mesophyll cells
- enhancer−like element involved in anoxic specific inducibility
- gibberellin−responsive element
- involved in endosperm−specific negative expression
- light responsive element
- MYB binding site involved in drought−inducibility
- MYB binding site involved in flavonoid biosynthetic genes regulation
- MYB binding site involved in light responsiveness
- MYBHv1 binding site
- part of a conserved DNA module array (CMA3)
- part of a conserved DNA module involved in light responsiveness
- part of a light response element
- part of a light responsive element
- part of a light responsive module
- part of a module for light response
- part of an auxin−responsive element
- part of gapA in (gapA−CMA1) involved with light responsiveness
- protein binding site
- sequence conserved in alpha−amylase promoters
- wound−responsive element
