

Table S1C Macroscopic description of incised/excised pottery samples (Stentinello II ware).

Sample code	Class	Morphology	Sample description	Fabric description
RC288	excised pottery	uncertain/ closed shape	Wall fragment of a closed vessel decorated with cut bands.	Fine, well-levigated grey fabric with a sandy matrix containing small to medium inclusions.
RC289	excised pottery	uncertain/ closed shape	Wall fragment of a closed vessel decorated with elliptical impressions and horizontal excised motifs; the surface is burnished.	Fine, well-levigated grey fabric with small sandy inclusions.
RC290	incised pottery	uncertain	Wall fragment of an undetermined vessel type decorated with incised lines.	Brownish-red fabric well levigated, with fine sandy inclusions.
RC291	incised pottery	uncertain	Wall fragment of an unidentified vessel decorated with an incised, radiating motif resembling solar rays.	Fine, well-levigated fabric with a sandy matrix containing inclusions of varied size, along with greyish inclusions that may represent poorly levigated temper.
RC292	incised/excised pottery	uncertain/closed shape	Wall fragment of a closed vessel decorated with incised lines forming a radiating solar motif; the poorly preserved surface was likely burnished	Very fine grey fabric with a sandy matrix containing medium-sized inclusions.
RC293	incised pottery	uncertain/closed shape	Wall fragment of a closed vessel decorated with incised lines forming a radiating solar motif.	Fine-grained grey fabric with yellowish patches and small sandy inclusions.
RC294	incised pottery	olla	Wall fragment of an olla with a handle attachment, decorated with parallel horizontal incised lines.	Fine-grained, well-levigated grey fabric with small sandy inclusions.
RC295	excised pottery	uncertain/ closed shape	Wall fragment of a closed vessel decorated with incised groups of vertical and tangential horizontal lines.	Fine-grained, well-levigated grey fabric with small sandy inclusions.
RC296	incised pottery	uncertain/ closed shape	Wall fragment of a closed vessel decorated with incised lines, showing clear evidence of burnishing.	Fine, well-levigated grey fabric with small sandy inclusions.
RC297	incised pottery	olla	Wall fragment of an olla with a broad, shallow surface decorated by three incised lines; the fabric is light in color.	Very fine, well-levigated fabric showing a biscuit effect, with thin brownish-pink margins and a grey core; inclusions are mostly microscopic sandy particles (<1 mm) with occasional larger ones (<2 mm).
