

Supplementary Figure S1 The sampling distribution of the 192 accessions in Yunnan Province

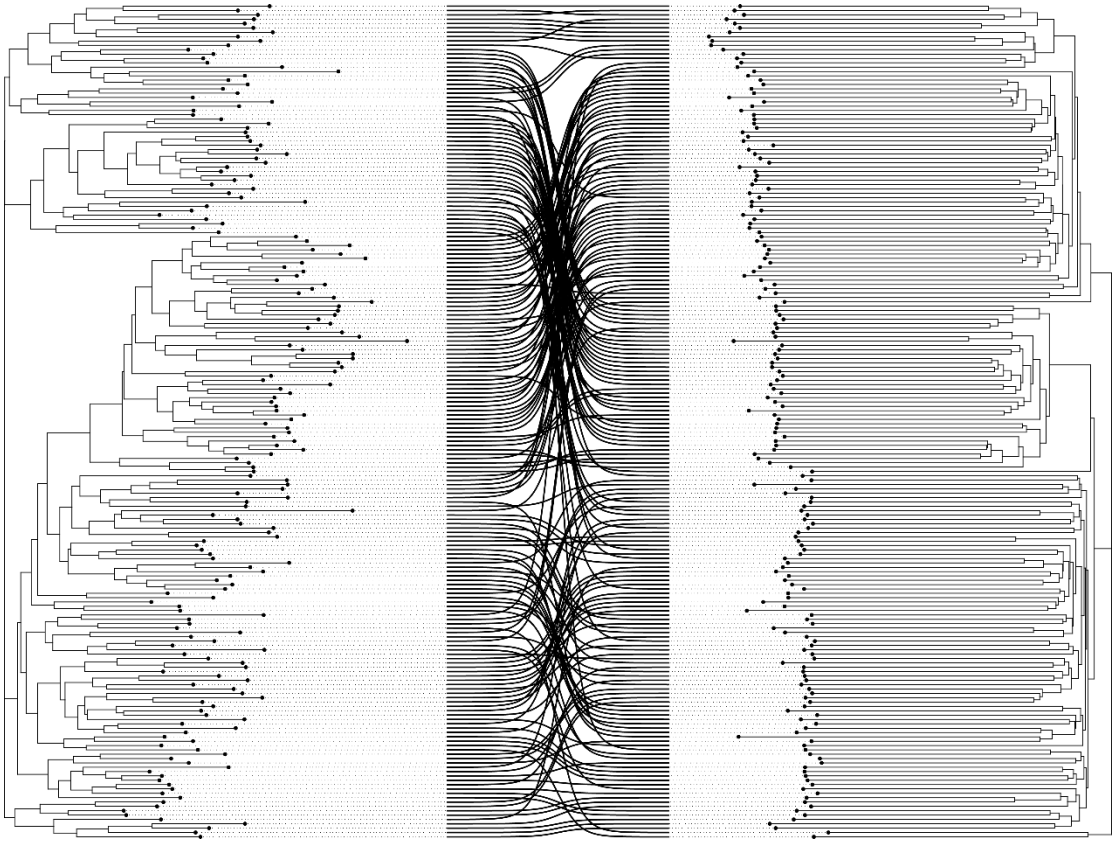

Supplementary Figure S2 The distribution of eight descriptive leaf traits between two groups. Colors indicate the scoring categories defined in Table S1.

Supplementary Figure S3 The comparison of nine quantitative leaf traits between two groups. Colors indicate the group defined in Fig. 3A.

Supplementary Figure S4 The distribution of seven ISSR amplification patterns between two groups. Colors indicate different genotypes defined by the seven ISSR primers.

Supplementary Figure S5 The comparison of the clustering trees between this study and those previously reported.
