

Supplementary Table S2. The RT-PCR results for the detection of PPV, PPV-D, PPV-M and PPV-REC in Bosnia and Herzegovina. Detection of PPV was conducted using the universal primer P1/P5. Information is provided for single sample from each orchard, stating the geographical region of the orchard and cultivar. Positive samples (+), negative samples (-). The samples in which PPV was previously confirmed by ELISA are gray shaded.

Orchard	Region	Sample number	Cultivar	PPV	PPV-D	PPV-M	PPV-REC
