

Table S2. Description of dimensions related to technology acceptance (professionals).

Dimensions	Description
Clinical usefulness	It investigates the perception of the usefulness of this type of monitoring in the IGM setting
Management usefulness	For management usefulness we intend to investigate the utility of use in practical management: time spent and resources.
Web interface ease of use	This dimension investigates the ease of viewing and collecting data recorded by the device
Collaboration	Collaboration means how much the healthcare professional feels involved in managing this type of monitoring and how much collaboration they perceive from the patient
