1 Search methodology

Seven databases were searched on 05 June 2019. The search strategies looked for information on child, migrant or foreign domestic workers, with studies set in a named high-income country removed. The search strategy was compiled in the OvidSP Medline database by Jane Falconer, and refined with the project team until the results retrieved reflected the scope of the project. The final Medline search was amended to run across the other databases.

As the vocabulary used for this search is very common across a variety of subject areas, and there are no subject heading terms which adequately cover child domestic workers, migrant domestic workers or foreign domestic workers, a mixture of proximity searching and focused subject headings were used, where available. The list of high income countries was derived from the World Bank country classifications from July 2019.

The databases searched were:

1. OvidSP Medline and In-Process & Other Non-Indexed Citations and Daily, 1946 to June 04, 2019.
2. OvidSP Embase+Embase Classic, 1947 to 2019 June 04.
3. OvidSP Global Health, 1910 to 2019 week 21
4. OvidSP EconLit, 1886 to May 23, 2019
5. Web of Science Core Collection, which included:
    a. Science Citation Index Expanded, 1970 – 2019/06/04
    b. Social Sciences Citation Index, 1970 – 2019/06/04
    c. Arts & Humanities Citation Index, 1975 – 2019/06/04
    d. Conference Proceedings Citation Index- Science, 1990 – 2019/06/04
    e. Conference Proceedings Citation Index- Social Science & Humanities, 1990 – 2019/06/04
    f. Emerging Sources Citation Index, 2015 – 2019/06/04
6. ProQuest International Bibliography of the Social Sciences (IBSS), complete database as of 05/06/2019.
