

Supplementary Material:

Table S1: Basic information of the lakes.

Table S2: Number of zoobenthos taxa in the five lake districts.

Table S3: Abbreviation and full name of assessment indices

Table S4: Abbreviation and description of potential environmental predictors used in modeling.

Figure S1. Spatial pattern of macrobenthos of shallow lakes along the mid-lower Yangtze River.

Figure S2. Sampling point vs. residual local taxa richness for macrozoobenthos.

Figure S3. Quantile regressions of O/E₅₀ index on total nitrogen (TN, mg/L), total phosphorus (TP, mg/L), chlorophyll *a* of phytoplankton (Chl *a*, µg/L), Secchi depth (Z_{SD}, m), annual submersed macrophytes biomass (B_{Mac}, g/m²) and ratio of Secchi depth to water depth (Z_{SD}/Z_M, m) (sample sizes differ because of deficient sampling).

Figure S4. Quantile regressions of B-IBI index on total nitrogen (TN, mg/L), total phosphorus (TP, mg/L), chlorophyll *a* of phytoplankton (Chl *a*, µg/L), Secchi depth (Z_{SD}, m), annual submersed macrophytes biomass (B_{Mac}, g/m²) and ratio of Secchi depth to water depth (Z_{SD}/Z_M, m) (sample sizes differ because of deficient sampling).

Figure S5. Quantile regressions of ASPT index on total nitrogen (TN, mg/L), total phosphorus (TP, mg/L), chlorophyll *a* of phytoplankton (Chl *a*, µg/L), Secchi depth (Z_{SD}, m), annual submersed macrophytes biomass (B_{Mac}, g/m²) and ratio of Secchi depth to water depth (Z_{SD}/Z_M, m) (sample sizes differ because of deficient sampling).

Table S3. Abbreviation and full name of assessment indices

Abbreviation	Full name
S_O	observed species richness
S_E	expected species richness
A	Area
O/E_{SA}	observed to expected index based on species-area model
O/E_{RF} (RIVPACS)	observed to expected index based on random forest model (River Invertebrate Prediction and Classification System)
O/E_0	O/E_{RF} based on taxa with probabilities of capture greater than 0
O/E_{50}	O/E_{RF} based on taxa with probabilities of capture greater than 0.5
O/E_0 -null	null model of O/E_0
O/E_{50} -null	null model of O/E_{50}
B-IBI	Benthic Index of Biotic Integrity
ASPT	Average Score Per Taxon

Table S4. Abbreviation and description of potential environmental predictors used in modeling

Abbreviation	Description
LON	Longitude
LAT	Latitude
Pour_long	Pour_longitude
Pour_lat	Pour_latitude
AREA*	Lake area (km ²)
Wshd_area	Watershed area (km ²)
Shore_len	Length of shoreline (km)
Depth_avg	Average lake depth (m)
Slope_100	Average slope within a 100-meter buffer around the lake polygon (°)
Dis_avg	Average long-term discharge flowing through the lake (m/s)
Res_time*	Average residence time of the lake water (day/year)
Mois	Average moisture of lake (mm)
SubBas_id	Subbasin identity of lake
ELEV_avg	Average elevation within lake (m)
bio_1	Annual mean temperature (°C)
bio_2*	Mean diurnal range (°C)
bio_3	Isothermality

bio_4	Temperature seasonality (°C)
bio_5	Max temperature of warmest month (°C)
bio_6	Mean of min temperature of warmest month (°C)
bio_7	Temperature annual range (°C)
bio_8	Mean temperature of coldest quarter (°C)
bio_9	Mean temperature of driest quarter (°C)
bio_10	Mean temperature of warmest quarter (°C)
bio_11*	Mean temperature of coldest quarter (°C)
bio_12	Annual precipitation (mm)
bio_13	Precipitation of wettest month (mm)
bio_14	Precipitation of driest month (mm)
bio_15	Precipitation seasonality (mm)
bio_16	Precipitation of wettest quarter (mm)
bio_17	Precipitation of driest quarter (mm)
bio_18	Precipitation of warmest quarter (mm)
bio_19	The precipitation of the coldest quarter (mm)
Prec_mean	Mean precipitation of spring and autumn (°C)
Tmax_mean	Mean of maximum temperature in spring and autumn (°C)
Tmin_mean	Mean of minimum temperature in spring and autumn (°C)
Prec_sd*	The standard deviation of precipitation in spring and autumn (°C)
Tmax_sd	The standard deviation of maximum temperature in spring and autumn (°C)
Tmin_sd	The standard deviation of minimum temperature in spring and autumn (°C)
Prec_cv	The coefficient of variation of precipitation in spring and autumn (°C)
Tmax_cv	The coefficient of variation of maximum temperature in spring and autumn (°C)
Tmin_cv	The coefficient of variation of minimum temperature in spring and autumn (°C)

*Environmental variable selected from RF model in O/E-RF

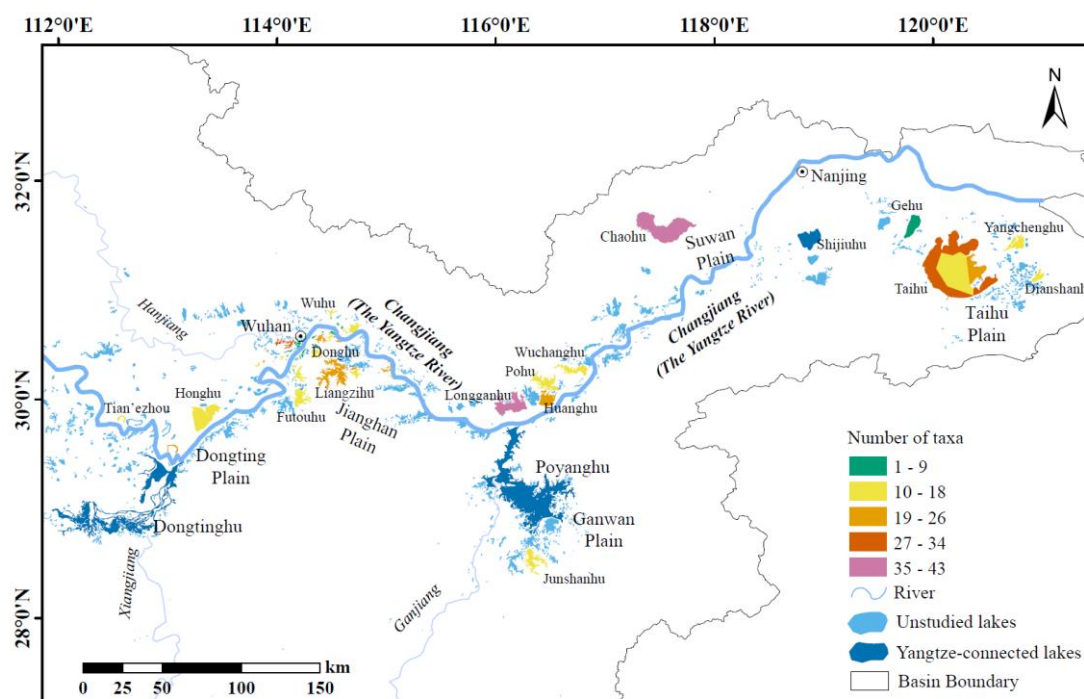

Figure S1. Spatial pattern of macrobenthos of shallow lakes along the mid-lower Yangtze River

Figure S2. Sampling station vs. residual local taxa richness for macrozoobenthos

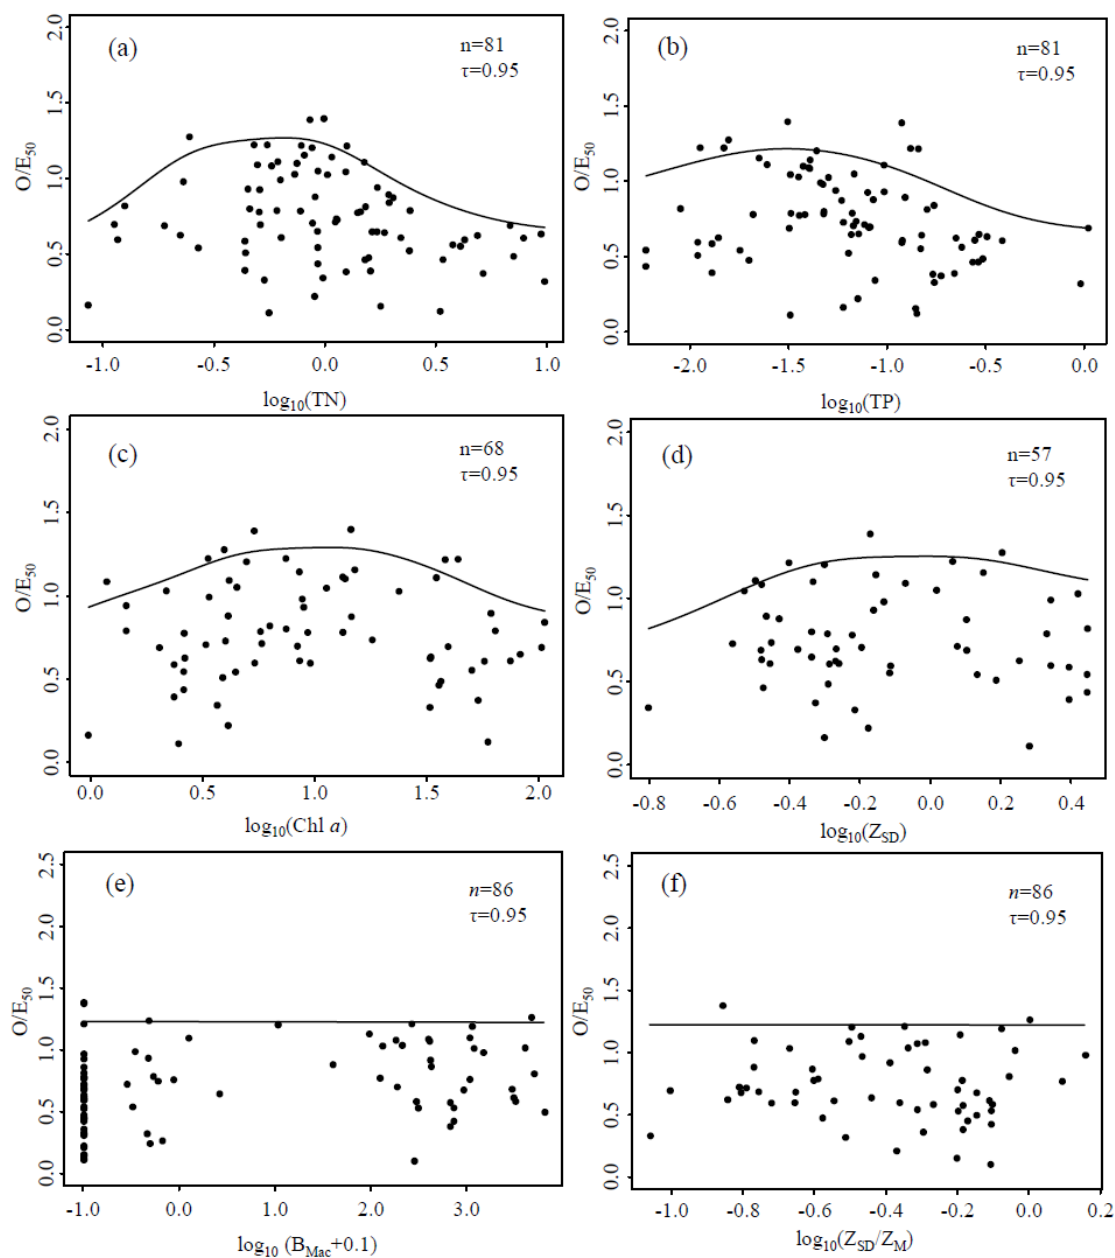

Figure S3. Quantile regressions of O/E₅₀ index on total nitrogen (TN, mg/L), total phosphorus (TP, mg/L), chlorophyll *a* of phytoplankton (Chl *a*, µg/L), Secchi depth (Z_{SD}, m), annual submersed macrophytes biomass (B_{Mac}, g/m²) and ratio of Secchi depth to water depth (Z_{SD}/Z_M, m) (sample sizes differ because of deficient sampling)

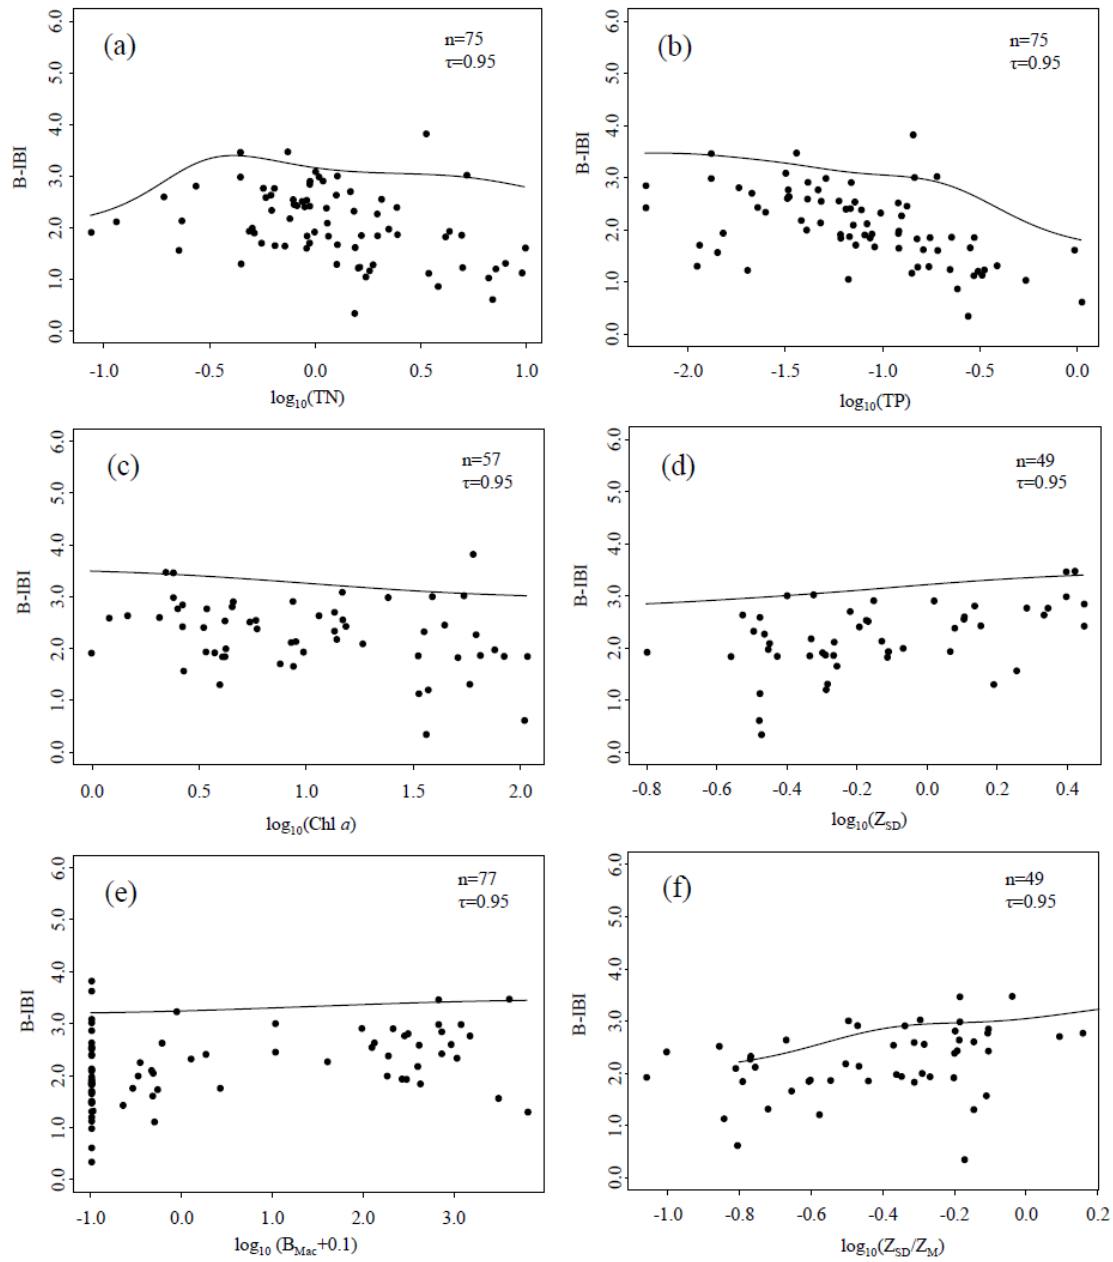

Figure S4. Quantile regressions of B-IBI index on total nitrogen (TN, mg/L), total phosphorus (TP, mg/L), chlorophyll *a* of phytoplankton (Chl *a*, µg/L), Secchi depth (Z_{SD}, m), annual submersed macrophytes biomass (B_{Mac}, g/m²) and ratio of Secchi depth to water depth (Z_{SD}/Z_M, m) (sample sizes differ because of deficient sampling)

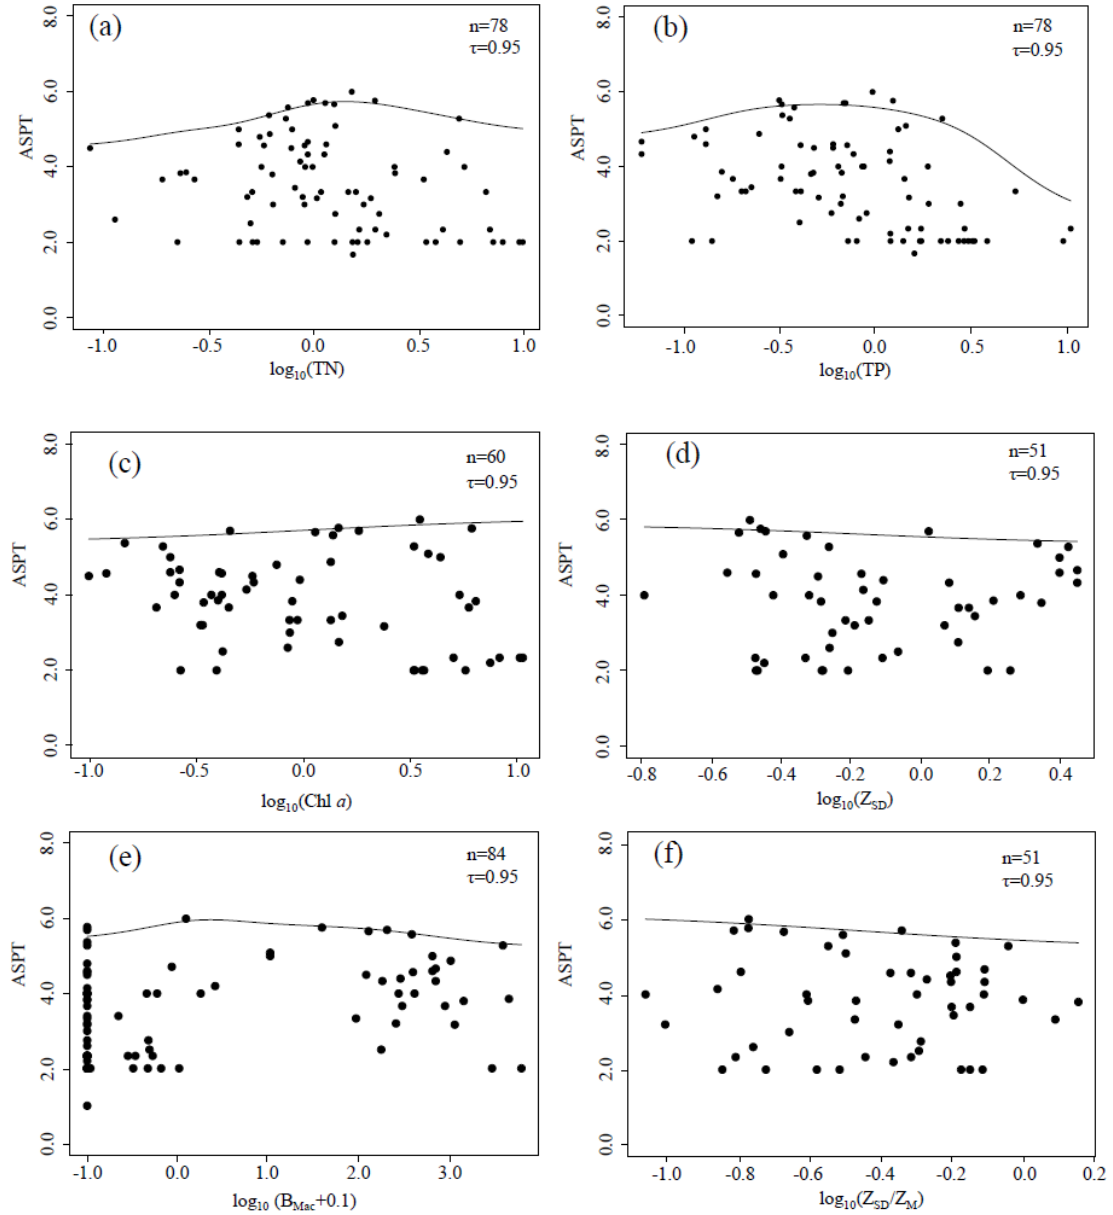

Figure S5. Quantile regressions of ASPT index on total nitrogen (TN, mg/L), total phosphorus (TP, mg/L), chlorophyll *a* of phytoplankton (Chl *a*, $\mu\text{g/L}$), Secchi depth (Z_{SD} , m), annual submersed macrophytes biomass (B_{Mac} , g/m^2) and ratio of Secchi depth to water depth (Z_{SD}/Z_M , m) (sample sizes differ because of deficient sampling)
