

## Abbreviations

ABI: Ankle Brachial Index	MEX-SLEDAI: Mexican Systemic Lupus Erythematosus Disease Activity Index
ADA: American Diabetes Association	MFR: Myocardial flow reserve
AIx: Augmentation index	mFRS: Modified Framingham Risk Score
AoS: Aortic stiffness	MMP-1: Collagenase-1
APS: Antiphospholipid syndrome	MMP-7: Matrix metalloproteinase-7
ASCVD-ACC/AHA: Pooled Cohort Risk Equations-American College of Cardiology/American Heart Association	mSCORE: Modified Systematic Coronary Risk Evaluation
BILAG: British Isles Lupus Assessment Group	NETs: Neutrophil extracellular traps
BMD: Bone mineral density	NICE: National Institute for Health and Care Excellence
CEC: Cholesterol Efflux Capacity	NLR: Neutrophil-to-lymphocyte ratio
CES-D: Center for Epidemiological Studies-Depression	N/S: Not stated
cIMT: Carotid intima-media thickness	PGA: Physician Global Assessment score
CVD: Cardiovascular disease	PON1: Serum paraoxonase and arylesterase 1
ESRD: End-stage renal disease	PREDICTS: Predictors of Risk for Elevated Flares, Damage Progression and Increased Cardiovascular Disease in Patients with SLE
FACIT-F: Functional Assessment of Chronic Illness Therapy – Fatigue	PROCAM: Prospective Cardiovascular Münster Study risk calculator
FMD: Flow-mediated dilation	PWV: Pulse wave velocity
FRS: Framingham Risk Score	QAS: quality arterial stiffness
GlycA: Glycoprotein acetylation	QRISK3: QRESEARCH risk estimator, version 3
HOMA-IR: Homeostatic Model Assessment of Insulin Resistance	SCORE: Systematic Coronary Risk Evaluation
HRQOL-SF 36: Health-related quality of life -The Short Form-36 Health Survey	SLAQ: Systemic Lupus Activity Questionnaire
hs-CRP: High sensitive C-reactive protein	SLEDAI: Systemic Lupus Erythematosus Disease Activity Index
ICD-10: International Classification of Diseases 10th Revision.	SLICC/ACR-DI: Systemic Lupus International Collaborating Clinics/American College of Rheumatology-Damage index
IDL: Intermediate density lipoproteins	TG/HDL-C: Serum levels of triglyceride/ high-density lipoprotein cholesterol ratio.
IL-6: Interleukin-6	TNF: tumor necrosis factor
LAP: Lipid accumulation product	TRAIL: TNF-related apoptosis-inducing ligand
LDL: low-density lipoprotein	
Med Diet: Mediterranean diet	

**Table S1:** Characteristics of individual evidence sources related to obesity.

Source	Year of publication	Country	Setting	Type of study reported by the authors	Time frame	Number of participants	Percentage of women	Obesity assessment	Obesity definition	Burden measures
