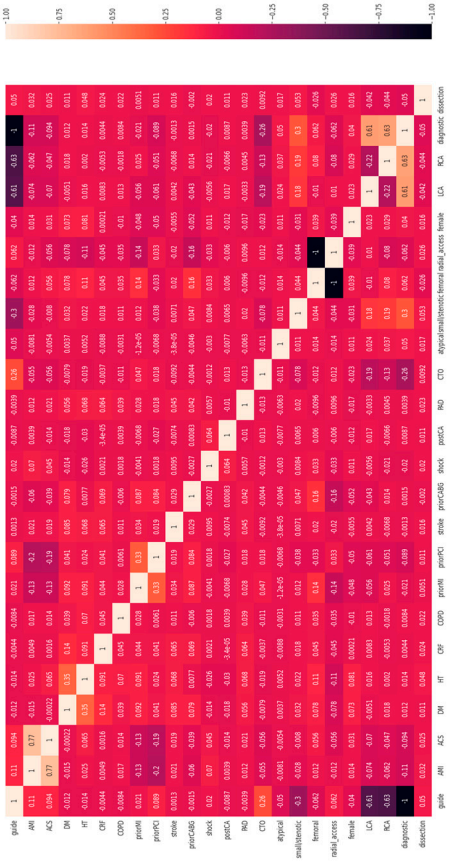

Figure S1. Correlation matrix of candidate variables (for abbreviations see Table S1).

Table S1. Univariate analysis of candidate variables.

	Feature	Odds_Ratio	*p* Value
0	guide	7.486	<0.001
1	AMI	3.246	<0.001
2	ACS	2.726	<0.001
3	DM	1.649	0.029
4	HT	4.982	<0.001
5	CRF	3.639	<0.001
6	COPD	4.404	<0.001
7	priorMI	1.246	0.303
8	priorPCI	1.543	0.029
9	stroke	2.993	0.005
10	priorCABG	0.845	0.846
11	shock	4.585	0.003
12	postCA	2.745	0.041
13	PAD	4.487	<0.001
14	CTO	1.890	0.100
15	atypical	4.987	0.010

16	small/stenotic	5.528	<0.001
17	femoral access	0.328	<0.001
18	radial access	3.045	<0.001
19	female	1.792	0.002
20	LCA	0.244	<0.001
21	RCA	0.234	<0.001
22	diagnostic	0.134	<0.001

ACS, acute coronary syndrome; AMI, acute myocardial infarction; atypical, atypical origin of coronary artery; CA, cardiac arrest; CABG, coronary artery bypass grafting; COPD, chronic obstructive pulmonary disease; CRF, chronic renal failure; CTO, chronic total occlusion procedure; diagnostic, angiography procedure; DM, diabetes mellitus; guide, use of a guiding catheter (angioplasty); HT, arterial hypertension; LCA, left coronary artery intubation; MI, myocardial infarction; PAD, peripheral arterial disease; PCI, percutaneous coronary intervention; RCA, right coronary artery intubation; small/stenotic, coronary ostium ≤ 3mm and/or with ≥ 30% stenosis.
