

Supplementary Figures

Figure S1. The structure of *ENO2* mutant (*eno2*<sup>-</sup>).

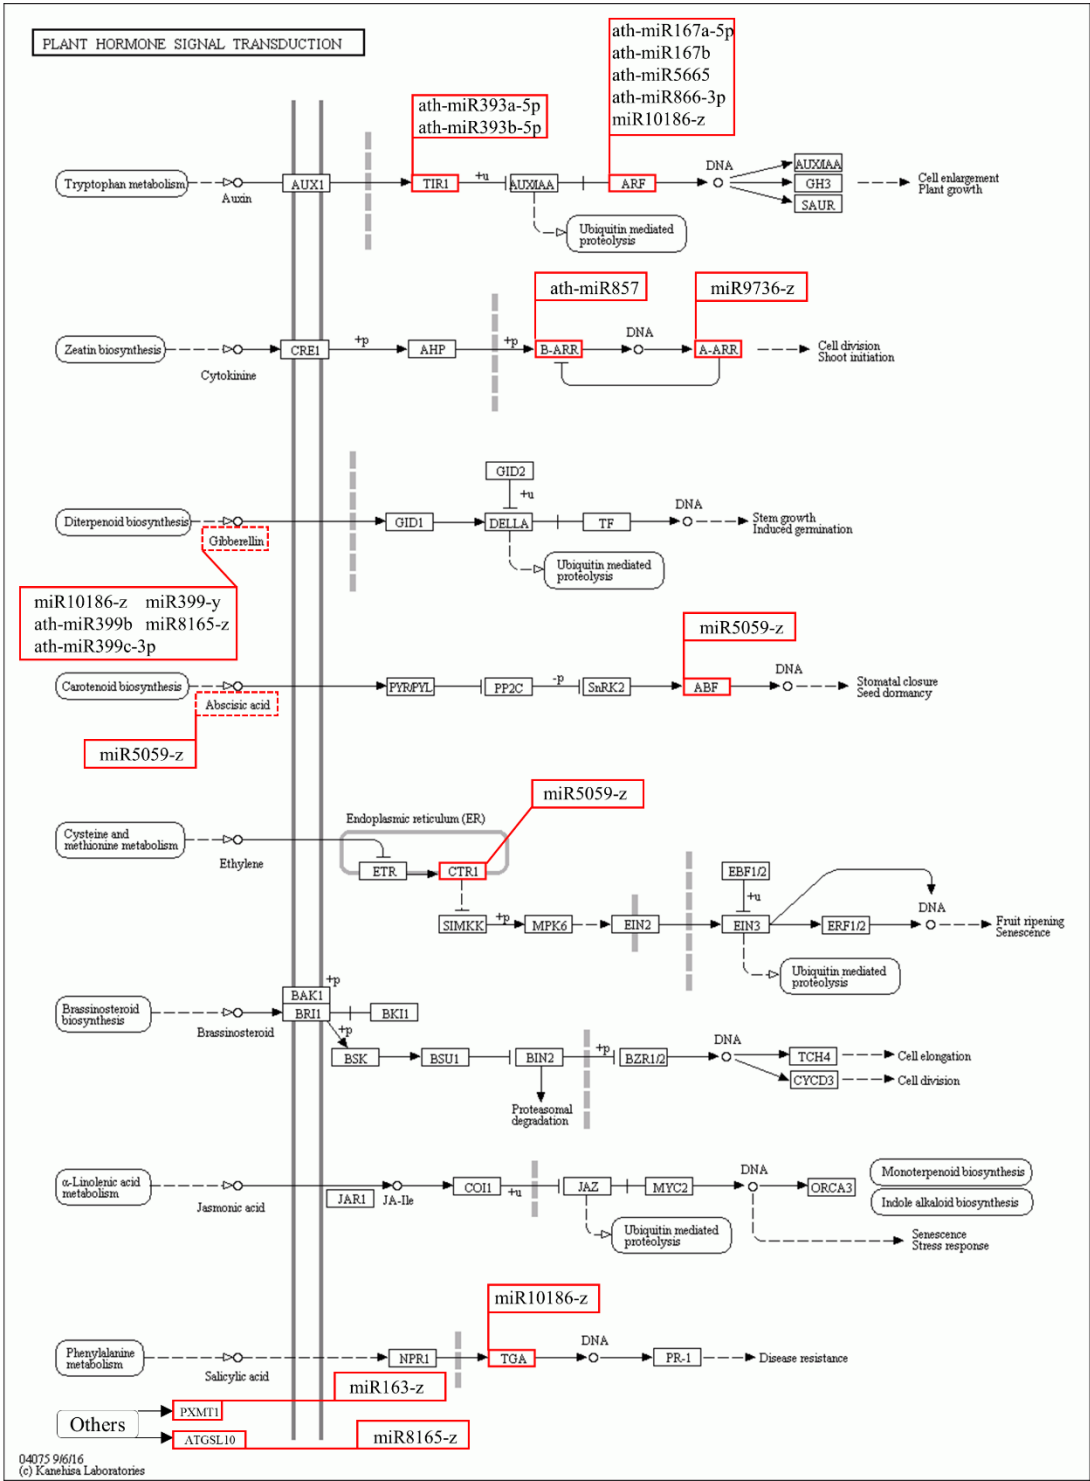

Figure S2. Phytohormone signal transduction pathway and related miRNAs that regulate seed germination.

**Figure S3.** TF-miRNA-gene regulatory network.

Cytoscape (Cytoscape\_3.7.1) was used to analyze these miRNAs and their target genes. The red circles represent miRNAs, and the green and purple circles were their target genes. The gene with purple circles were also transcription factors.
