ND: Not detected. Serum samples from all 74 CDK patients were analyzed for lanthionine. In 49 samples, lanthionine was below the LOQ (limit of quantification 0.2 µM in serum matrices-ND). Patient characteristics: Sex, age, lanthionine (µM), Glomerular Filtration Rate (GFR ml/min/1.73 m²) and the Agatston Score based on patients' TCS (No Agatston score: 0; Agatston score 1: 1–100; Agatston score 2: 101–300; Agatston score 3 > 301).
