

SUPPLEMENTARY MATERIAL

**Figure S1.** Bar plots expressing the mean  $\pm$  SEM (n=3) for secreted cytokines of mDCs, pDCs and 1:1 culture in baseline conditions and after stimulation with LPS.

**Figure S2.** Gene expression profiles of mDCs and pDCs 6h after LPS or CpG or CpG control stimulation. Bar plots representing the mean  $\pm$  SEM (n=3) relative to control mDCs. \*p < 0.05.
