

Supplementary Figures S1 and S2

**Figure S1.** Pathways related to the main miR-34a targets (*BCL2*, *MET*, *NOTCH1*, and *SIRT1*), selected from *in silico* analysis (the figure was generated using the GeneMANIA website tool, <https://genemania.org/>).

**Figure S2.** Pathways related to the main miR-21 targets (*PDCD4*, *PTEN*, and *RECK*), selected from *in silico* analysis (the figure was generated using the GeneMANIA website tool, <https://genemania.org/>).
