

Supplementary Materials

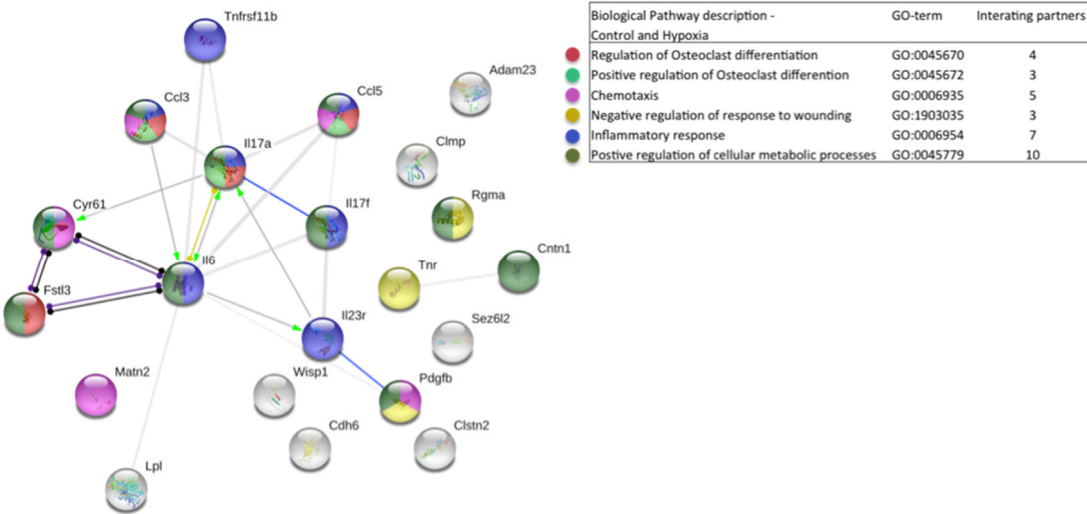

Figure S1. Key proteins of interest after 1 week. Graphical representation of biological pathways and interactions of significant proteins, control vs. IHT, after 1 week. The same coloring indicates the same biological pathway description. Data are extracted from STRING version 11.0 (string-db.org).

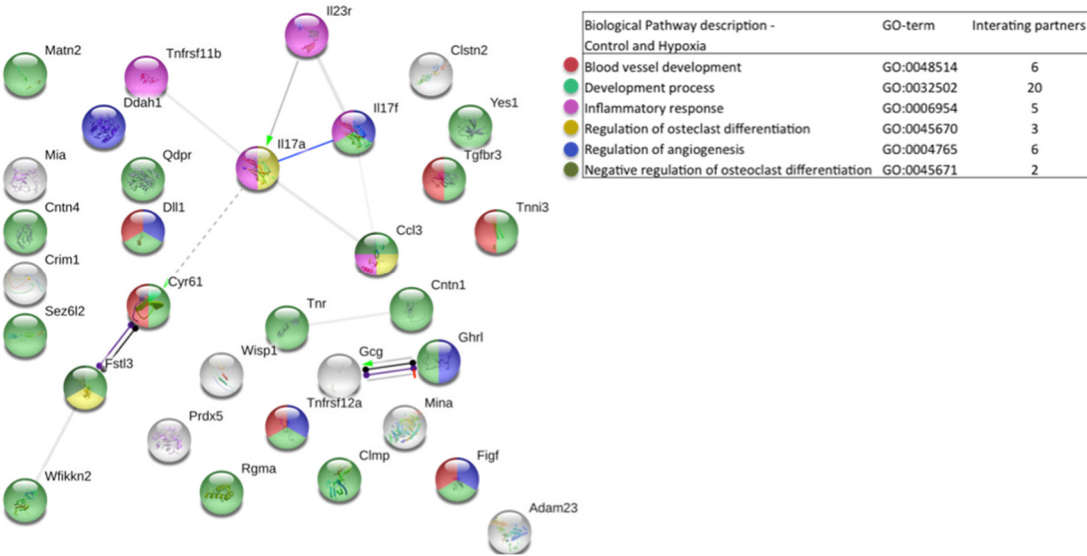

Figure S2. Key proteins of interest after 4 weeks. Biological pathways and interactions of significant proteins, control vs. IHT, after 4 weeks. The same coloring indicates the same biological pathway description. Data are extracted from STRING version 11.0 (string-db.org).
