Supplementary Figure S2: Control staining to assess the specificity of α SMA MAbs. (A) IF staining of commercially available hu-man fibroblasts (BJ-5ta CRL-4001TM) with α SMA MAbs conjugated with AlexaFluor[®]555. (B) Staining of ascites spheroids with the same α SMA and with a different primary MAbs followed by secondary an-ti-mouse MAb conjugated with Alexa Fluor[®]488. Nuclei were stained with DAPI.
