

Supplementary Figure S1: Quantification (see Methods section) of HGS-EOC cells in the bulk ascites samples, based on PAX8+ staining, compared to the total number of cells/field based on DAPI staining. Numbers on correspond to the Profiling protocol numbers of the collected ascites. Details of each #case are in Supplementary Table 1. (A): six independent cases; (B) comparison of three successive withdrawals of ascites of the same two patients (details in Supplementary Table 1).
