Table S4 Different type of transcripts with class code were detected using Gffcompare

Class_code	Description	Number
=	Complete match of intron chain	42029
i	Transfrag falling entirely within a reference intron	212
j	Potentially novel isoform (fragment):at least one splice junction is shared with a reference transcript	25065
o	Generic exonic overlap with a reference transcript	3672
u	Unknown, intergenic transcript	5443
x	Exonic overlap with reference on the opposite strand	1911

Table S5 Alternative splicing(AS) events in the transcriptome of different samples

Sample name	SE	RI	A5SS	A3SS	MXE	Total
